Leaders begin talks

(AP) President Jose Napoleon Duarte and his Brazilian counterpart, Mario Vargas Llosa, opened their first talks here Wednesday, October 17.

This was the first visit of a Brazilian head of state to El Salvador in 14 years. The two men met with no apparent tension, but officials said the talks will cover a range of issues.

The meeting took place at the presidential palace in San Salvador, with President Duarte speaking first. He praised Brazil's economic growth and said he looked forward to a strong and lasting relationship between the two countries.

He also thanked Brazil for its support during the civil war and for its role in the integration of Central America.

(AP) The State Department has confirmed that two Iranian military officials were killed in a weekend attack on the U.S. embassy in Tehran.

The officials, who were killed in a suicide bombing, were identified as a member of the Quds Force and a member of the Iranian Revolutionary Guard.

The Quds Force is a paramilitary group that is tasked with carrying out missions outside of Iran's borders.

(AP) The United States and Russia have agreed to resume talks on the issues of nuclear disarmament and non-proliferation.

The decision was reached during a meeting between President Boris Yeltsin and President Bill Clinton in Moscow, Russia.

Both leaders stressed the importance of the talks and the need for continued dialogue.

(AP) President Bill Clinton has called for a nuclear freeze and a ban on the testing of nuclear weapons.

In a speech to the United Nations General Assembly, Clinton said that the United States and Russia have reached an agreement to begin talks on a nuclear freeze and a ban on nuclear testing.

(AP) The United Nations has called for a moratorium on nuclear testing in the Middle East.

The recommendation, which was adopted by the UN General Assembly, was made by a resolution that was introduced by several Arab countries.

(AP) Zimbabwe has announced plans to build a new nuclear power plant.

The announcement was made by the country's minister of energy, who said that the plant will be built to provide electricity to the country's capital city, Harare.

The minister said that the construction of the plant will begin next year and that it will be completed in 2015.

(AP) The International Atomic Energy Agency (IAEA) has issued a report on the status of the Iranian nuclear program.

The report, which was released on Tuesday, October 17, found that Iran has continued to accelerate its nuclear activities since the last report was issued in June.

The IAEA has expressed concern about Iran's failure to provide access to certain sites and to cooperate fully with the agency's inspectors.

The report also highlighted the lack of transparency in Iran's nuclear activities and the need for continued efforts to ensure that the country is not pursuing a nuclear weapons program.

(AP) The United States has announced plans to establish a new nuclear research facility near Los Alamos, New Mexico.

The facility, which is expected to cost $1 billion, will be used to study the effects of nuclear weapons and to develop new technologies for non-proliferation.

(AP) The United States has announced plans to withdraw from the 1987 Intermediate-Range Nuclear Forces Treaty (INF Treaty).

The decision was made by President Donald Trump, who said that the treaty no longer serves the United States' interests.

The treaty, which was signed in 1987, was designed to limit the number of intermediate-range nuclear missiles that the United States and the former Soviet Union could possess.

(AP) The United States has announced plans to reinstate sanctions on Iran.

The announcement was made by the U.S. Treasury Department, which said that the sanctions are being imposed because of Iran's continued support for terrorist groups.

The sanctions will include asset blocking, travel restrictions, and financial transactions restrictions.

(AP) The United States has announced plans to conduct a nuclear test in the Pacific Ocean.

The announcement was made by the Department of Energy, which said that the test is needed to ensure the reliability of the country's nuclear arsenal.

The test will be conducted on December 1, 2017.
Bill may make S/U choice secret from professors

By Lisa Mlrabella

SUNYA's S/U grading system has passed the test of time by allowing for some students' success and by avoiding any conflict of interest for professors. It is a system that has been in use for 15 years, and it is still in use today.

In 1979, SUNYA's S/U grading system was implemented as an alternative to traditional grading systems. It allows students to choose whether to receive a grade of S (satisfactory) or U (unsatisfactory) for a course. This system has been praised for its flexibility and for its ability to accommodate different student needs.

However, the system has also faced criticism from some professors who feel that it is too easy for students to pass courses without putting in the required effort. professors have also expressed concerns about the potential for grades to be manipulated by students.

In response to these concerns, SUNYA has implemented several measures to ensure the integrity of the grading system. These measures include requiring professors to submit grade reports for review, and requiring that all S/U grades be recorded in the university's academic records system.

SUNYA is currently exploring ways to improve the S/U grading system further. This includes considering the implementation of a pass/fail grading system in some courses.

Records of who is taking a course S/U "should be between the registrar and the student." - Harry Hamita

New dept. chair plans to make courses tougher

By Michelle Baster

The new chair of the African-American Studies Department, Dr. C. Jams Quann, has plans to make courses more challenging for students. Dr. Quann is determined to improve the quality of education at SUNYA and to make the African-American Studies Department one of the best in the country.

"We need to make our courses more rigorous," Dr. Quann said. "We need to challenge our students and push them to their limits. We need to make them work hard.

"We need to make our courses more relevant," she added. "We need to make our courses reflect the real world.

"We need to make our courses more interdisciplinary," she continued. "We need to make our courses reflect the diversity of African-American culture.

"We need to make our courses more engaging," she concluded. "We need to make our courses more interesting.

"I believe that these are the only ways to make our courses more challenging."
Outdoor activities are biggest draw at C-U Day

By Ailis O'Brien

Outdoor activities were the biggest draw at C-U Day Saturday.

"It was an opportunity to really see what the University is offering our students," said one student. "I really think that the outdoor activities were the highlight of the day.

The theme of the weekend's activities was "Outdoor Adventure," and it was designed to give students a chance to experience the many outdoor opportunities available on campus.

The activities began on Saturday with a variety of outdoor events, including a hike in the mountains, a canoe trip on the river, and a mountain bike race.

On Sunday, the activities continued with a visit to the campus dog park, where students could play with the many dogs that live on campus.

The weekend's activities were presented in an effort to promote community involvement and to encourage students to get involved in their neighborhood.

The festivites began on Saturday with Acting University President Judith Ramaley welcoming guests to the annual Parents Weekend/Community-University Day festivities.

The weekend's activities were also set up to answer questions and provide information.

Many students and parents enjoyed the variety of outdoor events and the opportunity to see what the University has to offer.

"It was really interesting. It gave me a chance to see a lot of things I haven't had the chance to see before," said one student.

The weekend's activities included a variety of outdoor events, including a hike in the mountains, a canoe trip on the river, and a mountain bike race.

Economics profs see Reagonomics as short-fad

By Michelle Busher

College professors see Reaganomics as short-fad.

Ronald Reagan's supply side economics claims helped generate record levels of economic growth, many campus econ departments have a vested career interest in simple stuffiness. Tenured economists successfully use supply-side economics, which forecasts that tax cuts not the "pump priming" of Keynesian economics, would best stimulate the economy.

"It's a very important idea," he conceded, "It's taught as part of elementary courses, Strong supply-side professors were talking about it in 1968, but it didn't have any legs."

"It's a very important idea," he conceded, "It's taught as part of elementary courses, Strong supply-side professors were talking about it in 1968, but it didn't have any legs."

Wheelchair athletes compete at sports exposition

By Ilene Weinstein

About 10 wheelchair-bound people, including SUNYA students, got the chance to play volleyball and go horseback riding this weekend as part of a variety of events featured in the Wheelchair Sports Exposition. SUNYA Alpha Epsilon Pi chapter provided a locker room as well.

The participants learned ways to play many sports designed to provide hands-on experience. Participants were taught how to ride on special equipment. Horseback riding is especially helpful in straightening bones. Wheelchair athletes stress shoulder and arm development and specially trained horses are used for that purpose.

"Horses have to be trained to accustomed to people in wheelchairs," Simmons said. "They can be challenging to work with, but I've seen some people really get along with horses." Participants learned the value of exercise, especially riding, which strengthens muscles and promotes natural movement in the joints.

The exposition was created by SUNYA's Director of Disabled Student Services Nancy Berlich, who added that "the biggest need is to provide information about the opportunities available to disabled people." The exposition was held in March of Dimes on the SUNYA campus.

The workshops, held at your local drug store and at selected supermarkets. In the 3-pack or convenient 12-pack.

Sound Problems Mar Klein's Performance

Klein's performance was marred by technical difficulties. The audience was frustrated by the constant interruptions, which Klein himself admitted were caused by sound problems. Klein regretted the situation, explaining that he had been working on the show for months and had expected a smooth performance. However, the sound system proved to be unreliable, causing confusion and frustration among the performers and audience members.

The show was supposed to feature a series of improvisational acts, each designed to showcase the performers' skills and creativity. However, the sound problems disrupted the flow of the performance, causing delays and interruptions. Klein was apologetic, suggesting that he would work with the sound crew to ensure better technical support in future performances.

Said Klein, "I'm deeply sorry for the inconvenience caused by the sound problems. We were hoping for a smooth performance, but technical issues often happen, especially in a complex production like this. I hope you can forgive us and understand our frustration as well."
Catering to Business majors

COLUMN

The professor who teaches the course in addition to having attended the restaurants and businesses specifically to cater to business majors, has been told they could see the effects of the business majors on their attitude. They have decided, however, to reorganize the business majors to accommodate business students, and the commitment of the committee changes to accommodate business students, and the school can see how and to what end.

The department also plans to add another course in the spring, which is designed to be of interest to incoming students in the fall and to accommodate business majors.

CATERING TO BUSINESS MAJORS

But since Mondale is not the naturally dynamic speaker or the charismatic leader that Reagan is, it is not surprising that he struggled to directly explain why he would be a better choice for the President.

As a consequence of this, Mondale's campaign has been criticized for its lack of focus on important issues. However, the campaign has also been praised for its emphasis on social justice and its commitment to fighting for the rights of all Americans.

In the end, Mondale is a candidate who is willing to fight for what he believes in and who is committed to making the world a better place. While he may not be the most charismatic candidate, he is a man of principle and integrity who is dedicated to serving the people of America.

Downtown Athletics facing a shaky future without Greene

By Michelle Busher

Institutional athletics for Alson and all university athletes are in the student’s hands now one of its coaches, Alson Athletics Department’s general manager, has stepped down after two years of service. The program is now completely under student control. The organization is the Student Association. It is a group of 30 students, all members of the varsity, football, track, and student affairs.

“Alson Athletics is the backbone of our student body,” said Alson Athletics Club President John Greene. “It’s a way to get involved, to help with the school’s reputation, and to support the Alson Athletics program.”

Many students who have made contributions to the program have done so in order to help their own teams. Some have even volunteered to coach their teams. “I’m really happy with the progress we’ve made so far,” said Greene. “I think we can carry out this plan very well.”

The next eight games will see 35 more NCSC students on similar charges.

Professor Ed Smith, chairman of the University’s Student Affairs Committee, said, “We know that many students will be affected by these charges. It’s important that we all work together to make sure that everyone is treated fairly.”

The event will be held on Thursday, October 25, at 7:00 P.M. at Chapel House.

Wisconsin students stage ‘drink-in’ flight 21 efforts

COLLEGE PRESS PRESS RELEASE

Students at the University of Wisconsin—Madison will stage a “drink-in” on the steps of the Student Union tomorrow at 9:00 P.M. to protest the current alcohol policy.

“We, the students, are tired of being told what to do, and we are fed up with the way things are run,” said one student activist. “We want the university to take action and make changes now.”

The protest will be led by a group of students who have been working on the issue for several months. They have met with university officials and have organized a number of other events to call attention to the issue.

The students are calling for the university to implement a new alcohol policy that is fair and reasonable. They are also calling for the creation of a new alcohol advisory board to make decisions about alcohol policy.

“The whole ‘get tough’ attitude toward student drinking is being met with student resistance,” said another student activist. “We’re fed up with the way things are run and we’re not going to take it anymore.”
Harassment

In a 1979 survey of Penn State students, 30 percent said they had been harassed. Nearly a fourth of Penn State's women handles formal complaints, or students department chairs. Affirmative Action University's Affirmative Action office. "Infor­

Danes shut out Cortland, 28-0

Saturday morning that we found out; I think we were looking forward to it. The Danes travel to Vermont to face the Catamounts on Saturday.

For the third time, New York State University at Albany's football team shut out Cortland, 28-0, in a non-conference game.

The Danes' defense was led by quarterback Mike Thomas, who had five tackles and one sack. The defense also forced two turnovers, including an interception by safety Mike Lewis, and a fumble recovery by linebacker David Brown.

Coach Paul Ripley praised his defense after the game, saying, "They did a great job today. They kept Cortland's offense from scoring and they held them to only 71 yards on the ground."

On offense, the Danes were led by running back Mike Bouchard, who had 130 yards and two touchdowns on 20 carries. Wide receiver Mike Devlin had 57 yards and a touchdown on five receptions.

"I'm proud of our offense," said Ripley. "They executed the game plan well and made some big plays."

The Danes' next game will be against the University of Massachusetts on Saturday, Oct. 20.

SPORTS BRIEFS

Boots lose

The women's soccer team suffered their third straight loss on Sunday, falling to UMass, 2-0. The team is now 4-6-1 on the season.

Albany's next game will be against William Smith on Wednesday, Oct. 17.

Hockey

The men's hockey team lost 3-0 to St. Lawrence on Saturday. The team is now 3-4-1 on the season.

The Danes' next game will be against Colgate on Wednesday, Oct. 17.

Rugby

The men's rugby team lost 28-13 to St. Lawrence on Saturday. The team is now 2-3 on the season.

The Danes' next game will be against Skidmore on Wednesday, Oct. 17.

**Netmen win sixth straight SUNYAC**

By Jack Sauer

The University of Albany men’s tennis team won its sixth straight SUNYAC tournament championship in Men’s Singles Tennis, Tuesday in the third round against SUNY Brockport. The team defeated Brockport, 5-0.

The team is now looking at a possible match-up against SUNY Fredonia, which defeated SUNY Geneseo, 4-1, in the final round of the tournament. If Fredonia wins, the two teams will meet for the SUNYAC championship.

**Job market is a letdown for some SUNYA grads**

By Tom Lepre

A 1982 study developed by the SUNYA Office of Institutional Research, found that out of all 1982 May graduates, 40% went to graduate school or a professional school on a part-time basis. "I think that’s a very, very good thing," said Major Researcher Donald Dorbon.

Dorbon mentioned that 1982 graduates who attended SUNYA had a lot of opportunities to gain practical experience, which is important for their future jobs. "We have to have the right balance between what we teach in the classroom and what we can do in the real world," he said.

Many graduates, though, report that they were unable to find jobs that they liked. Having a degree from SUNYA does not guarantee a job, many say. "I was sure I would be substituting at first," she said. "I was very lucky to get a job so quickly over the summer." He eventually landed a job in Education, which is very good and that helped me find a job where I wanted to be."
