Zimbabwe: Deceptive Rhetoric

by J.M. Fawole

It is a maxim of African experience that nationalist leaders are often more interested in consolidating their personal power than in the welfare of the people. This is especially true in the case of Robert Mugabe, the leader of the African National Congress (ANC) in Rhodesia. In his recent address to the African Students Union conference, Mugabe (as usual) gave a distorted view of the current situation in Rhodesia.

Mugabe's speech was a thinly veiled attempt to win over the African students to his cause. He condemned the Western powers for supporting the illegal government of Rhodesia. He also criticized Ian Smith, the prime minister of Rhodesia, for his policies of repression and racial discrimination. However, Mugabe said nothing about the real reasons for the current plight of the people of Rhodesia. He failed to mention the role of the ANC in the current situation.

The ANC has been in power in Rhodesia for over a decade now. It has done nothing to improve the living conditions of the people. Instead, it has continued to support the illegal government of Rhodesia. Mugabe's speech was a thinly veiled attempt to win over the African students to his cause. He failed to mention the role of the ANC in the current situation.

The ANC has been in power in Rhodesia for over a decade now. It has done nothing to improve the living conditions of the people. Instead, it has continued to support the illegal government of Rhodesia. The ANC's policies have only served to perpetuate the suffering of the people.

The ANC should be held accountable for its actions. It is time for the African students to demand better from their leaders. They should demand that the ANC do something to improve the living conditions of the people of Rhodesia. They should demand that the ANC work towards a just and peaceful solution to the current crisis.

Editorial: Our Man in Israel

"If you want to preview the American university of the 21st century, look at what is happening at SUNY today." These were the words of former Governor Nelson A. Rockefeller, as quoted by Time Magazine in 1968. While today's standards have certainly increased, the ideal seemed to have been realized.

The State University of New York (SUNY) has always been considered a model of what a modern university system should be. Its mission is to provide a high-quality education to all students, regardless of their economic background. SUNY has been successful in meeting this goal.

The SUNY system consists of 64 campuses, each with its own unique characteristics. Despite this diversity, all campuses share a commitment to excellence and innovation.
