When we brew our beer, we brew the bubbles, too

Genesee Beer is one of the few brews in the country that comes by its sparkle naturally. The carbonation that gives Genesee its cool, clean taste is brewed right in by an age-old process called "krasenning" (kroy-zhen-ing). It's a slow, patient process of natural carbonation that keeps the sparkle in the beer, makes the head last longer, masks the beer taste better. Krasenning is just one more reason why Genesee is a little more exciting than any other beer. Try one today.

visitation • a clear wall

Frank Reynolds

The Constitution imposes a clear wall between the government and the press. It is not a barrier of protection, but a means of separation. This is the purpose of the wall; to keep the government from being influenced by the press and the press from being influenced by the government. The wall is a separation of the powers, a separation of the functions of the government and the press. The press is a body politic, separate and distinct from the government, and has the right to investigate, criticize, and report on the actions of the government. The government is not a newspaper and the press is not a government. The wall is a barrier to protect the press from the government, and the government from the press.

Joplin’s "Kosmic Blues" is a powerful example of her expression and emotion.
