**APA Beat Desperados in Basketball**

Headed by Randy Egwunwo and John Holliday, the Whalers defeated the Desperados by a score of 32 to 21. The Whalers scored their first point less than 30 seconds into the game, while the Desperados took only 34 seconds to score their first point. The Whalers' lead was never threatened, and they maintained a comfortable margin throughout the game.

WASHINGTON (AP) — The Supreme Court today held that state and local governments may prosecute private homosexual acts and that the national government may not. The decision, which was 5-4, represents a major setback for civil rights advocates who have been calling for a federal ban on discrimination based on sexual orientation.

The court's ruling, written by Justice Sandra Day O'Connor, said that the Constitution does not prohibit states from enforcing laws that criminalize homosexual conduct. It concluded that the First Amendment protects the right to engage in private consensual acts, but that the government cannot compel people to express their beliefs in a manner that offends others.

The case, United States v. Windsor, involved a same-sex couple, Edie Windsor and her partner, Thea Spyer, who had been married in Canada. The couple moved to New York City, where they were denied a marriage license. When Spyer died, Windsor was not entitled to a death benefit under her spouse's pension plan because she was not legally married.

In her opinion, Justice O'Connor wrote that the Constitution does not require the federal government to recognize marriages that are legal in other states. She noted that the United States has no interest in ensuring that a person's entire life is covered by the Social Security Act.

Justice Anthony M. Kennedy, writing for the majority, said that the Constitution does not prohibit states from enforcing laws that criminalize homosexual conduct. He concluded that the government cannot compel people to express their beliefs in a manner that offends others.

Justice Antonin Scalia, joined by Chief Justice John G. Roberts, Jr., dissented. He said that the Constitution does not prohibit the government from compelling people to express their beliefs in a manner that offends others.

The decision is likely to be appealed to the Supreme Court of the United States.
Alternative Sources of Energy

By Brian Smith
In his book, "The Creation of the Sun: The Last Great Mystery," scientist Stephen Hawking suggests that the energy industry is in its infancy and there is much we can still learn about how to harness the sun's energy. So far, methods have been developed for converting the sun's energy into electricity and thermal energy, but a more complete understanding of the sun's energy sources is needed.

Editor's Note: Last in a series on residences in the United States, solar power has been discussed as an alternative source of energy. In the future, it is likely that solar power will be a more common source of power for homes and businesses.

With additional funds, we may be able to provide more homes with solar power. However, to make the most of solar power, we need to develop a better understanding of the sun's energy sources. Only then can we fully utilize solar power.

Geothermal power involves tapping into the earth's geothermal resources. These resources are laden with energy that can be converted into electricity. In order to use this energy, a well is drilled into the earth to tap into the geothermal resources. As with solar energy, the raw power is converted into electricity.

A better understanding of fluid mechanics and materials science is needed in order to fully utilize geothermal resources. In order to use this energy, a well must be drilled to tap into the geothermal resources. As with solar energy, the raw power is converted into electricity.

It is fitting to conclude a discussion of energy sources with fusion power. Fusion power is a type of energy that results from the fusion of hydrogen isotopes. Unlike fission power, fusion power is a much safer and cleaner source of energy. However, the development of fusion power is still in its infancy. Further research is needed to fully utilize fusion power.

Are you interested in going to LAW SCHOOL?

Announcing:
Hofstra Law School's Pre-Law Summer Training Institute

Hofstra Law School will offer a "Pre-Law Summer Training Institute" for six weeks from June 8 to July 15. Taught by Professor Sunil Bhatnagar, a member of the Hofstra Law School faculty, the Institute will help you develop the analytical skills and advocacy techniques needed for successful completion of law school. The curriculum will include case analysis taught with the traditional Socratic Method, legal research and writing, and advocacy techniques and methods of taking law school examinations. A Certificate of Successful Completion will be awarded at the end of the course.

Minimum Requirements for Admission
Applicants must have successfully completed two years of college.

If you plan to attend Law School, get a jump on your fellow students by registering for this program.

Welt Pre-Law Summer Training Institute, Hofstra Law School, New York, 11594, or call (212) 696-9026.

Environmental Studies Defended

By Bill Smith
The Environmental Studies Institute at the University of Illinois has been in the news recently. The Institute is a research and teaching center that focuses on environmental studies. The Institute has been controversial, with some people saying it is too liberal and others saying it is too conservative.

Ira Birnbaum, a former Student Association Vice President and the sole student member of the Task Force, said he had reservations about the program. However, his concern was not about the environment, but about the cost of the program.

The Task Force members all agreed that the cost of the program is a concern. In order to fully utilize the environmental program, we need to develop a better understanding of the sun's energy sources and the geothermal resources. This will require additional funds.

The concept of using each region's energy sources with fusion power is an interesting one. However, it is still in its infancy. Further research is needed to fully utilize fusion power.

It is fitting to conclude a discussion of energy sources with fusion power. Fusion power is a type of energy that results from the fusion of hydrogen isotopes. Unlike fission power, fusion power is a much safer and cleaner source of energy. However, the development of fusion power is still in its infancy. Further research is needed to fully utilize fusion power.
Alternatives

The whole question of fusion power arises around what is to be developed. If any program being contemplated even begins to seriously be grown by fusion would melt materials. Approaches are being taken to contain the process, and some scientists are producing that containment model will be ready to operate by 1990. This is one of the key points that this growth has been actively encouraged by the power companies for years. When even the most translucent were applied, this growth slowed down. Our energy needs have been growing, it seems that relationships which no longer necessarily exist.

Our energy needs have been growing, and we must ask in consideration of the three questions: "Are we prepared to support these programs?" "Are we prepared to support these programs?" "Are we prepared to support these programs?"

GUIDE TO LIVING OFF CAMPUS
Part IV

PREPARING TO MOVE OFF CAMPUS

The Off Campus Association's

The Off Campus Association provides support and guidance for students living off campus. Our mission is to ensure that students have a comfortable and safe living environment.

Our services include:

- Advice on finding and renting housing
- Assistance with legal and health issues
- Guidance on transportation and day care

We also offer various activities and events to promote community and social interaction.

Please visit our website at www.offcampusassociation.com for more information.

Volunteer wanted to teach introductory art classes to low income students. Please call J. Larry Riley, 7-1296.

The Midair College Activities Board is sponsoring its Second Annual Photo Festival and Competition in early May, 1976. For further information and application, please call or write to:

Ms. J. Larry Riley, 482-6602

Student Life Office, CC 130

For questions or concerns, please contact:

The Off Campus Association

Your voice and support are important to us.

Please feel free to contact us at any time.
DETERMINE YOUR NEEDS
Before you begin your search for housing, you should determine your needs. What is your budget? Do you want to live alone or do you prefer to share a place? Are you looking for a permanent residence or are you just looking for a short-term place to stay? Once you have determined your needs, you can start your search.

THE HUNTINGTON APARTMENT
The Huntington Apartments are a great option for those looking for a place to live. The apartments are well-maintained and offer a variety of amenities. They are located in a convenient location, close to public transportation and within walking distance of the city center.

HOW TO CONTACT LANDLORDS
If you're interested in renting an apartment, you can contact the landlord directly. Many landlords list their apartments online, so be sure to check out their website. You can also contact the Housing Board to get a list of available apartments.

LANDLORDS AND LEASES
Many landlords are required to give tenants a copy of their lease, which outlines the terms of your agreement. Be sure to read through your lease carefully and ask any questions you may have.

Utilities
Utilities are typically included in your rent. This can be a great savings for you. Be sure to ask your landlord what utilities are included in your rent and how much you can expect to pay for any extra charges.

Spruce up the place. Don't paint, but do wash windows and fabric-covered window coverings. Inventory your apartment's features—space, storage, high ceilings, appliances. Then check your meter. If you're only paying for electricity, check the time lag will facilitate redecorating and moving.

There are several things you should keep in mind when looking for housing. First, be sure to determine your needs and budget. Once you have done this, you can start your search. There are many resources available to help you find housing, including online listings and the Housing Board.

redeem them. And I would like you to know among students in the SUNY system. Right selfish and self defeating than I care to believe. totally equitable.

are asking for two who brought up some good points in CARS, L- MORR.

Unfortunately I do think that most students don't realize what the bill was really about, whereas I would hope that there would have been more discussion, although there are more self and self defeating causes below. A major reason for the rally was contest among students in the SUNY system. Right now things are happening in other states which could change the entire horizon. Hopefully we help solve these problems together we will eliminate all of them. In conclusion I hope you realize that the ETH bill will keep us as the lowest level in programs across the nation. In my view, this is not only a matter of student's rights, but also of the nation's future. And it will be the way to look at this, but not this way. The key to a successful student government is responsible students. Responsible students must get to the better interests of the students who elected them. Too often, this does not happen. People in government sometimes get stuck by us and by our friends only well known, they must based on our own devices, students representatives really don't know what their constituents want and don't care enough energy to find out. They simply assume that they know what's best for them. Representing students in government is no easy task. The demands from constituents would help representatives decide what stands they should take. If students aren't interested in their government, then that government will be unable to effectively cater to what student interests are. Students can only make their government more responsive by telling them what they want. The first step is to make students interested in voting and really study. They must vote for candidates who are well known, they must make sure that their votes are counted. The candidates are in favor of equal rights and respect the needs and interests of students. The key to a successful student government is responsible students. Vote early, vote often, and vote smart.

Whalers Beat Nanooks; Go One Up
Mark Goodwin's power play goal at 12:14 of the first period proved to be the very score needed at the buzzer to lift the Nanooks, 2, in Game 2 of the AMIA Plaque Hockey Finals.

Goodwin directed a Paul Schanck screen pass from the left of Nanook's goalie Rich benzoni while the Nanooks went short-handed. Bill cones added a second power

Bushmen Win AMIA-League II Hoop
continued from page seven
This weekend's final round of competition will be held in Rushmore's gymnasium. The South Dakota State Aggies and the University of Nebraska Cornhuskers will meet in the final game of the playoffs. The Aggies won the first game, 74-62, on Friday night, and the Huskers won the second game, 83-66, on Saturday night.

The Aggies will be favored to win the championship, as they have been the dominant team in the league this season. They have won 12 of their 14 games, losing only to the Huskers in the regular season.

The Huskers, on the other hand, have struggled all season. They have won only 5 of their 14 games, losing to the Aggies in the regular season and in the first round of the playoffs.

The Aggies are led by senior guard John Smith, who averages 18 points per game. Smith is a skilled scorer, with a strong outside shot and a good handle on the ball.

The Huskers are led by sophomore forward Tim Jones, who averages 15 points per game. Jones is a strong rebounder and a good field goal shooter.

The game will be played on Saturday afternoon at 3:00 PM. It is expected to be a close game, with the Aggies favored to win.
### Bobcats Win ’Chair Hoop
