English Students Begin Supervising Mine Study Hall

A group of scholars in educational psychology will soon be given a large dormitory study hall in the State College of Teachers. The program of study will be designed to meet the requirements for the degree of Bachelor of Arts in Education. The work in the program will be based on the principles of the psychology of education, the study of educational psychology, and the development of educational psychology. The program will be divided into two main parts: (1) the study of educational psychology, and (2) the study of educational psychology in practice. The study of educational psychology will be divided into two main sections: (1) the study of educational psychology in general, and (2) the study of educational psychology in particular. The study of educational psychology in general will be divided into two main sections: (1) the study of educational psychology in general, and (2) the study of educational psychology in particular. The study of educational psychology in particular will be divided into two main sections: (1) the study of educational psychology in general, and (2) the study of educational psychology in particular.

two regulars who keep pleasant terms with the park-keepers. The younger, who is named John, is a wholesome-looking fellow who seems to enjoy the atmosphere of the place, while his companion, a middle-aged man, whom I shall call Mr. Brown, is fond of sitting on the porch of the park-keepers' cottage and reading the newspaper. John has a strong body and a cheerful disposition, which make him a favorite with the children. Mr. Brown, on the other hand, is solemn and austere. He has a sharp eye for any dishonor in the circle, and is not afraid to express his disapproval in no uncertain terms.

When I first met him, I was struck by his evident dislike of the Dusky. "He's a poor fellow," he said, "and his faults are many." This opinion was shared by the other members of the park-keepers' society, who were also inclined to look with disfavor upon the Dusky. But John, who had known him for years, was more lenient in his judgment. "He's a good fellow," he said, "and he has a right to be here just as much as any other." This spirit of tolerance was characteristic of John, who was always ready to give a fair chance to all.

But Mr. Brown was less lenient in his treatment of the Dusky. He was always on the lookout for any sign of impropriety, and was not afraid to give the Dusky a stern warning if he suspected him of anything amiss. On one occasion, for instance, he observed the Dusky engaged in a game of cricket, and was not pleased to see him indulge in such a sport. "What are you doing there?" he asked. "You know you're not allowed to play cricket here." The Dusky, who was always prompt in his obedience, apologized and promised to behave better in future.

John, on the other hand, was not so strict in his treatment of the Dusky. He was always ready to give him a chance, and was not afraid to speak up in his behalf when he was unjustly criticized. "He's a good fellow," he said, "and you shouldn't judge him by the company he keeps." This spirit of tolerance was characteristic of John, who was always ready to give a fair chance to all.
WHAT THE MILDNESS OF CAMELS MEANS TO FAMOUS AVIATORS

Lieutenant Commander Frank Hawks, U.S.N.R., famous holder of 214 speed records and the Harmon Trophy, says: "I've been flying for 19 years and smoking Camels almost as long. Making speed records puts the pilot as well as his plane. Camels never make me jumpy or bother my physical 'condition' in any way. As the soldiers say, Camels are so mild they don't get the wind. And I've found they never upset my nerves. Camel must use choice tobacco.

"I smoke Camels all I want," says Col. Romeo Turner (right), "continual speed ace. "Because of their mildness, Camels never give me a jangled nerve or upset my nerves. After smoking a Camel I get a 'refill' in my taste. As a speeding flyer uses up energy, so when I'm fatigued or jumpy or bother my physical 'condition' in any way. As the soldiers say, Camels are so mild they don't get the wind. And I've found they never upset my nerves. Camel must use choice tobacco."

"I appreciate the mellow flavor of Camels," says Capt. Charles Kingsford-Smith, the transpacific flyer, "one-time dean of engineering at Harvard since 1898. He is a jumpy or bother my physical 'condition' in any way. As the soldiers say, Camels are so mild they don't get the wind. And I've found they never upset my nerves. Camel must use choice tobacco."
