Gay concerns being debated via R. Rizzolo

A forum which has been existed for almost as long as the college has existed, the college's gay-straight forum, held Wednesday and chaired by R. Rizzolo, has attracted a diverse audience from across the SUNY community and the CSI student body.

Several speakers took the floor, including the Gay and Lesbian Alliance,homosexual students as well as the Student Association, both of whom were present to argue that the tunnels are necessary for the distribution of goods to all four campuses.

The meeting was held in the Student Union Room, and was followed by a question-and-answer period, during which attendees had an opportunity to express their views on the issue.

The forum provided an opportunity for students to discuss the issue in a safe and open environment, and for the college to hear a variety of perspectives on the matter.

The forum was a positive and productive step towards addressing the concerns of the gay and lesbian community on campus.

**Africa Day attracts an SRO crowd**

By Reeta Gomberg

Africa Day was celebrated on campus with a series of events intended to educate students about African culture and history. The day began with a panel discussion exploring different aspects of African education, history, and culture. Speakers included professors from SUNY Oswego and SUNY New Paltz, as well as members of the local community. The panelists discussed topics such as African education systems, the impact of colonialism on education, and the role of education in promoting African identity and national pride.

The afternoon featured a workshop on Zambian art and culture, led by an artist from Zambia. Participants had the opportunity to create their own artwork inspired by Zambian cultural symbols and motifs. The workshop was interactive, allowing students to engage with the material and ask questions directly to the artist.

The day concluded with a performance by an African dance troupe, which highlighted traditional African music and dance styles. The performance was followed by a reception where students could enjoy African cuisine and engage in conversation with the performers.

The event was part of the larger African Day celebration, which aims to raise awareness about African culture and history. Speakers emphasized the importance of education in promoting understanding and appreciation of African cultures, and highlighted the need for continued efforts to support African education and development.

Pi Lam celebrates charter
Saturday night at the Kappa Delta Phi’s homecoming, Alumni of Phi Lambda Psi received a formal charter which signifies the acceptance by the fraternity as an official chapter.

Jim Doolittle, Director of Campus Life, spoke at the banquet as did Ellen Engle, an Assembly member from the Home, and an address by outgoing President, Mike Lohertich.

“We now have some kind of permanency on campus,” President of Pi Lambda Psi, Mike Lohertich said. “We’ve received official recognition from our national council.”

“I mean a lot to the fraternity in the future,” said Lohertich, “It means a lot to us.” Pi Lambda Psi was founded at SUNY in November 1984.

Dancing the night away
A Schenectady marathon will take place on December 6-7 in the Dutch Quad and U-Lounge, according to Renee Siegel, an RA on Dutch Quad.

“There is a $15 entry fee per couple and we expect each couple to raise ‘per hour’ donations,” she said, “The purpose of the marathon is to make money for the students.”

All campus student groups have been offered the opportunity to sponsor a fund-raising booth,” she continued. “The purpose of the marathon is to make money for the students.”

“Alpha Delta Pi celebrates charter
Pi Lam was found at SUNYA in November, according to Liebowitz. "We've received official recognition of Ph Lambda Phi.

The purpose of the marathon is to raise money for the students. Pilferage at UAS

The University of Albany's Student Association Store (UAS) has been plagued by theft. While the store's managers admit that they do not have a method to distinguish breakage from theft, they believe that student theft is a significant problem.

The manager of the store's cash register, Ellie Willingham, said that the store loses about $6 a person when they search students. "We want to be as fair as possible," she said. "But if we don't do anything, we're giving them a reason to steal." Students generally agree that the store's efforts to stop theft are not effective.

The University of Maryland at College Park has also been dealing with student theft. The university's General Manager of Campus Operations, Norbert Zahm, estimated that the cost of keeping track of the stolen items is about $4.99 a student. "We want to be as fair as possible," he said. "But if we don't do anything, we're giving them a reason to steal." Students generally agree that the university's efforts to stop theft are not effective.

The University of Pennsylvania has also been dealing with student theft. The university's Director of Food Services, William Hynes, estimated that the university loses about $4.99 a student. "We want to be as fair as possible," he said. "But if we don't do anything, we're giving them a reason to steal." Students generally agree that the university's efforts to stop theft are not effective.

Aspects talks to Bob Guccione, Jr.

Theodore Guccione Jr. sits down with the editor of the New York-based magazine, *Spin*, to discuss the state of the music industry and the role of independent music in it.

Guccione: Because underground music is something that is really important.

Interviewer: Why should anybody bother with underground music?

Guccione: What we're trying to do is get the same pap (pap is soft food for the stomach) that we've been giving to the majors and give it to the independents. That's what we're doing. We're trying to create a market for underground music. We don't care if it's successful, we just want to create a market for it.

Interviewer: What do you think of the majors' role in music today?

Guccione: The majors are just following what's happening. They're not creating it. They're not leading it. They're just copying what the independents are doing.

Interviewer: How's *Spin* doing as a business?

Guccione: We're an independent corporation. We're not dependent on any one group. We're independent. We're not beholden to any one corporation.

Interviewer: What was the first group/performance that you remember really liking?

Guccione: Oh, that's easy. Sandi Shaw's "Pop goes a"-"Pop goes a". We'd probably put her up on the cover before we even knew what she was on about seven.

Interviewer: What's the most important music story of the year?

Guccione: It's the most important because it's one of the most simple of all the stories. It's the most simple, the most basic, the most fundamental, the most primitive. It's a story of people who are doing something that's different and they're doing it well.

Interviewer: What do you think the future of the music industry will be like?

Guccione: I don't know. I can only speculate. I think that underground music is going to continue to grow. It's going to continue to be important. It's going to continue to influence the mainstream. It's going to continue to be a force in music.

Interviewer: What's the future of the music industry?

Guccione: I don't know. I can only speculate. It's going to be a mixture of both. It's going to be a mixture of both. It's going to be a mixture of both.

Interviewer: What was the first group/performance that you remember really liking?

Guccione: Of course, it was the Beatles. They were the first group that I remember really liking. They were the first group that I remember really liking.

Interviewer: What's the future of the music industry?

Guccione: I don't know. I can only speculate. It's going to be a mixture of both. It's going to be a mixture of both. It's going to be a mixture of both.

Interviewer: What was the first group/performance that you remember really liking?

Guccione: Of course, it was the Beatles. They were the first group that I remember really liking. They were the first group that I remember really liking.

"It won't be as bad for me as for other people because I'll be 21 anymore, but I'm still going to drink the same amount I drink now."

— Robert Hersch

"It's going to be a lot better there, will be less entailed and less trouble. I won't have to stack up and party in my house."

— Kim Lewis

"Dozens of Album Giveaways—The Top 91 Songs of All Time."

University police at SUNY also have a less than perfect record, according to Mishler. "By my knowledge there's never been a case of a person arrested, but I do have a lot about racial bias, unnecessary charges and seizures," he said, adding, "I've heard this from enough experienced students to believe it."

Neil Garfield, president of the Pre-Law Association, said of the process of trying to set up a review board on campus: "It's not working on exactly them, but I think it would be good to have a place to express grievances."

Mishler said, "To my knowledge there's never been a case of a policeman shot and killed suspects where a police officer has broken the law."

He added, "I've heard this from enough experienced students to believe it."

Mishler stressed, "It is true that a little bit of knowledge can be dangerous. If you think you know you're right, or think he can't search you or arrest you, they'll probably put the charge on you and you'll just get in more trouble."

"If they are going to search you, they'll do it. Your rights will be lost, or they will be taken."

Mishler added, "Police are the only people in society who can get away with things which would be illegal if others did them."

"The purpose of police," said Mishler, "is to prevent crime and to protect the public. If we had a police state, if they had more flexibility and power, there would be less crime. But we aren't supposed to have a police state. The purpose of the police is to be limitations on their authority."

Mishler said of police authority by referring to two cases in which policemen shot and killed suspects erroneously, one of which occurred here in Albany in 1984. In both cases, the officers were white, the suspects were black (one was a 14-year-old boy) and no legal action was taken. Mishler contended that being policemen is "a terrible job. They are tremendously inadequate, and this is on the campus of the state university."

"We asked to make right decisions."

"It's very easy for a person to sit back and say you made the wrong decision."

"It's my opinion that there has to be more democratic control of police."

"There has to be more democratic control of police."

"First of all," he began, "shut up, don't volunteer anything. You really do have the right to remain silent and anything you say will be used against you."

"You can't consent to a search of any kind. Sometimes an officer has the right. If you consent, he'll always have the right, he said."

Mishler stressed, "It is true that a little bit of knowledge can be dangerous. If you think you know you're right, or think he can't search you or arrest you, they'll probably put the charge on you and you'll just get in more trouble."

Mishler added, "Police are the only people in society who can get away with things which would be illegal if others did them."

"The purpose of the police is to prevent crime and to protect the public."

- Prices
- Foreign-born graduate students can now be more easily hired and funded by the university. This is due to the implementation of new guidelines that allow for more flexibility in the hiring process.

The guidelines are designed to help schools comply with new federal regulations regarding the hiring of foreign-born graduate students. These regulations require schools to provide proof of funding for each foreign-born graduate student they hire.

Under the new guidelines, schools can now hire foreign-born graduate students on a temporary basis, without having to provide proof of funding. This allows schools to hire more foreign-born graduate students, which can help to address the current teacher shortage.

However, schools must still comply with other regulations, such as those related to the use of funds and the maintenance of accurate records.

The guidelines also require schools to provide training for foreign-born graduate students on issues related to cultural differences and the U.S. educational system. This training is designed to help foreign-born graduate students better understand the American educational system and to prepare them for their new roles.

Overall, the new guidelines are expected to help schools hire more foreign-born graduate students, which can help to address the current teacher shortage and improve the quality of education for all students.
KIBBUTZ STUDY IN ISRAEL
ANNOUNCEMENT
STUDENTS
SUMMER, 1986
A summer program on a kibbutz in Israel is planned for the summer of 1986, sponsored by the State University of New York at Albany. The focus will be "THE KIBBUTZ AND THE OUTSIDE WORLD," asking how members of a communal settlement interact with other Israelis and non-Israelis whom they encounter daily and who represent different ways of life from their own. The program includes working on the kibbutz, study tours, community credit, and Israel as an ism. The approximate cost (subject to change) will be $1,900 plus tuition. The program will be a six-week course in June and July. The faculty member in charge is Walter P. Zenner, Associate Professor of Anthropology.

If you are interested and would like to receive a full brochure and application-forms, please fill out the blanks below. Please send the forms to Professor Walter P. Zenner.

Albany women booters conclude season at 8-8

By Marc Paseltiner

The Albany State women's soccer season reached its goal this year as they finished the season at 8-8. By improving from a 5-9-1 record last year, this year's team continued to take one step up in the right direction as they became a team that could not be taken lightly.

The Danes were primarily a team of youth, made up of primarily sophomores and freshmen, but what the team lacked in experience was compensated by their raw talent on the field.

The team's inability to put the ball in the net was the primary reason Albany didn't win a few more games. The Defense was led by two players, sophomore forward Kim Castagnola and freshmen forward Karie McNamara, and that wasn't always enough.

The Danes were far from primed in this season as evidenced by their 10-2 loss to Hartwick and Ohio, two BIGCAC playoff teams. The Magie loss of the game against Union College was the third game against Union College in the NTSCAG tournament when the Danes emerged victorious by a 6-4 margin.

The impact of Castagnola and McNamara was also felt in the Danes 29 total goals this season. McNamara, a transfer from Rider, was the Danes' leading goalscorer with 12, tying the school record for goals in a season. Lazardines' nine goals upset her career total of 16, and her 21 total career points (goals and assists combined) surpassed Ann Carrigan's scoring record of 18 and four assists.

While the statistics show that McNamara and Lazardines scored most of the goals, a two new effort that brought much of the credit to the Danes in 1984-85. However, it was that new effort which made the Danes have a great lineup at the end, and we won't be bad in the middle either. D

University Auxiliary Services Announces LUCKY NUMBERS GAME

The winner receives a dinner for two featuring Shrimp Cocktail, Sirloin Steak, and Lobster Tails.

Dinner will be served to you in your quad dining room.

State & Indian quad... Nov. 19 dinner Filden & Brubacher... Nov. 21 dinner

Albany women booters conclude season at 8-8

By Marc Paseltiner

The Albany State women's soccer team continued to build on the momentum they established last season. The Danes finished the season with an overall record of 8-8-1, which included a 5-2 victory over Rensselaer Polytechnic Institute in the final game.

The team's performance throughout the season was impressive, as evidenced by their ability to compete with top teams. The Danes' offense was led by senior forward Joan Lazarides, who scored a career-high of 11 goals, surpassing the school record for goals in a season. Senior midfielder Chris Celenza and freshman forward Joan了不少, bringing the team's total to 16, and her 22 total career points, setting a new school record for goals in a season.

The team's inability to put the ball in the net was the primary reason Albany didn't win more games. The offense was led by two players, captains forward Laura McNamara and forward Joanne Lazarides, and the team's willingness to work hard earned their respect.

The Danes were far from pushovers when it came to defense. The team had a strong defense, allowing a total of 21 goals in 18 games.

The CoffeHouse in the Campus Center Rathskellar doesn't have a name. UAS invites you to sample America's "Think Drink" and to develop an original name for the Coffe House. The winner will "Fly Away With Coffee" to sunny Ft. Lauderdale.
