**Education in War and Peace**

Ever since December 7, 1941, America has been thrust into "the victory" phase. We have "Radios for Victory," "Salvage for Victory," "Buy for Victory," and so forth. In fact, most every campaign before the public is in "Win the war." Thus, we do not eulogize the fact that every day we find more people adding tremendously to the war effort and that our resistance to the world will win the war. There must be some, a will to win, and a hope of a better world. To establish this attitude there must be "Education for Victory."
