CAMPUS DAY A SUCCESS
Frosh Win Stunt

The kind of a game that you read about in novels was brought to reality in the frosh-Frosh vs. Junior-Soph Sketch contest Friday morning, one of the many features of Campus Day.

John "Bouse" Cassavant, a sophomore, was the hero of our novel and right footed the cause of the defeat of the Senior-Freshman aggregation. With thirty seconds to play, "Bouse" received the ball from Purcell, the center, and was all set to perform a nice play when he saw himself being challenged on three of his opponents. He dropped the ball, it kicked, hit the ground just as his foot castrated it and went for a drop kick clean over the goal posts, a boot that happens once in a lifetime.

This boot made certain the victory of the Junior-Soph eleven by twelve points. For the two touchdowns of the game were made by Howard Flynn for the victors, and by John "Bouse" Cassavant for the conqueror, who ran the ball seventy-five yards down the field after recovering a fumble.

In the cross-country race, the following were the two touchdowns of the game were made by Howard Flynn for the victors, and by John "Bouse" Cassavant for the conqueror, who ran the ball seventy-five yards down the field after recovering a fumble.

APPLY LOYALTY

There are so many people with high school minds in State College that high school minds need to be employed. After all, we have police patrolling our aisles in assembly Friday morning to maintain loyalty to Alma Mater. The presence of our assembly committee the last two weeks proves that the loyalty we have for Alma Mater does not need to be tended to courtesy. Of course, the majority of the students attending to hear the speeches in assembly is not out of enough value to be considered by those who are willing to enjoy pleasures, but are unwilling to work for the pleasures. Of course the main purpose in having a senior presidency in student assembly is to try out the stand of "sticking teacher" according to Alma High devices and unfairly taken for granted is the fact that all of our own who live these devices know fundamental law so well and have so much faith that they would be unproachable as presiding officers. The success of our own assemblies depends on loyalty and courtesy. Whatever student of State College is unwilling to aid in the improvement of our college is either too churlish here or too unalloyed of his time to vote a little of the debt be owed State College.

To be loyal, we must know what is going on in student assembly. If some students prefer Alma Mater as a legal guardian, in charge of our educational mother, let them deal with her in their court: but let the others not show the position of loyal love to Alma Mater in those who are interested in her welfare.

INNOCUOUS PERSIFLAGE

"Silence is golden and a closed mouth catches no flies"—such wise words we must heed. All warnings we will listen to. And the person who repeats let us be as parrot-like sequences to non-combatants. If we are of those who like to have something on the tip of our tongues, let us look farther than the mischief of the moment. Persiflage. But, if we are of those who like to have something on the tip of our tongues, let us look farther than the mischief of the moment. It is not the business of the parrot-like. But wh "advertise it?"

TO:"Silence is golden and a closed mouth catches no flies."—Neverthless catches no mice"—nevertheless catches no mice. Bears out an old proverb. "Silence is golden and a closed mouth catches no flies"—nevertheless catches no mice. Bears out an old proverb. "Silence is golden and a closed mouth catches no flies"—nevertheless catches no mice. Bears out an old proverb. It is not the business of the parrot-like. But wh "advertise it?"

ROUND THE COLLEGE

Alpha Epsilon Phi welcomes into full membership Lilian Ethrith, '24, and Sarah Schoenberg, '24.

Dorothy Vandervoorp, a Delta Omicron, will be away next week to Maxwell McDowell.

Lessons are being given by Miss Line, who is teaching at Chester, N. Y., where she was at College a few days last week.

The girls enjoyed their final party Friday, November 4, at Crossland's chaperoned.

Hildred Hesern, of Schenectady, visited Lura Eith, '23, last weekend.

Dorothy Bees of Kingston, was the guest of her cousin, Jacqueline Monroe, '25, at the "V" house Sunday.

Marvela Leamie, '22, spent the weekend in Schenectady.

Harridio Brown, '22, was in West Hartford last week to attend the funeral of a cousin.

Pol Gamma welcomes Margaret Smith, '23, into full membership.

Alice Norman, '22, was a guest of Leta Cackeen, '22, during the past week.

At a meeting of the active class held on November 3, W. H. M. was unanimously elected class choir leader.

Edward Lucey and Adrian Johnson left Thursday for State College, Pa., where they will attend the National Convention of kappa Delta Rho Fraternity. M. C. S. Y. W. C. A. are expected to join them there.

The chapter and the State is detergent the delegates from the other seven chapters for this convention.

Members of the classes in nutrition and dietetics, home nursing and child care were interested in a talk given by Dr. Otto F. Reilly on Tuesday in the department of home economics. Dr. Paulet spoke of the work of the clinics for the preschool and school children, and stressed the importance of preventative work with children. The students of nutrition under the direction of Miss Chlary Thompson, dietitian, and Mrs. Sanger, housekeeper at the Hospital School, were guests at dinner on Wednesdays at the home management house.

Beta Chapter of Omicron Nu sponsored the freshman of the state real economics department at tea in the Eta Phi house, Friday afternoon. Mrs. Alice A. Andrus, Ada, Miss Winkie, of Schenectady, Miss Ruth Thompson, of Schenectady, and Miss Margaret James of Albany, alumnae members, were present and told of the history of the organization.

Miss Tyce Kaufmann, state specialist in home economics education, and Miss Mary Conley, formerly instructor in home economics in the state of Wisconsin, will speak at ten at the Home Management house on Sunday.

ORGANIZATIONS

Neuman Club

The Newcomers clubs of the Capital district will attend high mass at St. Mary's, Troy, on Sunday, November 20. Bishop Edmund F. McGinley of Albany, will address the clubs at the 11 o'clock mass. Large delegations will be present from the Schenectady club, the R. P. L. Club and the Neuman Club of Troy. Miss Mabel Smith, of State College Club who are planning to attend, are asked to sign on the Neuman bulletin board. Automobiles will leave the College promptly at 10 o'clock. Be on time.

Press Club

The Press Club will hold a very important meeting on Wednesday, November 16, at 3 p.m. in Room 191. The only prerequisite for membership in this club is interest in its undertakings. Come one, come all.

Music Association

The next meeting of the Music Association will be held Friday, November 18, at 4:30 o'clock in Room 28. We shall continue the study of MacDowell. Mr. Candlynn will do one of his great works.

At the last meeting a sketch of MacDowell's life and works was given by Miss Hayek, '23, and as an introduction to our study and as a reward, we listened to the last standing of his compositions.

Edna Shaffer, '24, sang three of MacDowell's patriotic songs which were thoroughly enjoyed in hardly enough to be said.

Jacqueline Monroe, '25, played a piano solo, "To a Water Lily," by Debussy, which was well received.

The program committee for the year includes: Aileen Alderson, '29, chairman, Alyce Shaffer, '29, secretary, and Evelyn Duthie, '24.

All who wish to become members of the Association will have the opportunity to join by seeing the president or any of the faculty committee, consisting of Miss Lillian Meier, Miss Myra Thompson, Miss Harriet Thompson, Mabel Reilly, '23, Gladys Drury, '23, and Evelyn Duthie, '24.

An open house to welcome new members of MacDowell's profound pieces is scheduled for November 18.

The Political Science Club will meet Wednesday afternoon at 4 o'clock in Room 101. All who wish to become members of the Political Science Club will gladly welcome you.

The Newman Club of the College will have a meeting on Wednesday, November 16, at 5 p.m. in the chemistry lecture room.

The Political Science Club will meet next week on Monday, November 21, at 5 p.m. in the lecture room.

M. C. S. Y. W. C. A.
the problem in 1879. For a year he experimented, making an occasion to work forward a step. He thought a carbon thread would make the best filament. But it didn't operate in a more nearly perfect vacuum than any obtainable at the time. So he built a superior pump to secure such a vacuum. Then he struggled for weeks to find the right catalyst to carbonize into a filament, using bamboo, camphor thread, and finally cardboard paper.

Having made his small filament, and scored a sufficiently high vacuum on which it might operate inside a glass bulb, the next difficulty was to get the filament sealed inside the bulb. The connection between the filament and the current wire outside the bulb had to be made without any material that would expand and contract at the same rate as glass in order that the glass would not crack. He produced a coil of platinum and iridium which filled this need.

Then the first Edison lamp was made 21 August, 1879. When it was attached to a trial, employees in the Edison laboratories at Menlo Park, N. J., gaped excitedly over the number of minutes it would burn before the fragile filament broke. It burned 45 hours. Mr. Edison knew he had succeeded.

Since then other such making improvements have been made in the arc lamp, which, in various forms, is one of the highest products of electric lamp makers to-day.

This one thing and then another has been tried by experiment in lamps just as prehistoric man made his crude efforts in his own behalf. Constant research has given man a better and better lamp so that the same amount of light is given at four hundred million which are giving eight times as much light for a given input of current as Mr. Edison's original lamps, just as prehistoric man made his crude efforts in his own behalf.
