We want to take this opportunity to wish the cross-country team the best of luck at Wheaton tomorrow morning. More than the team, we wish the team an outstanding season. As our hearts sang the song of victory last year, we are now sure that this season will be exhilarating. With the music of the season, we wish the team good luck. We are not the only ones to whom the team has given their best, but they deserve the best.

At the beginning of the year we came out with an article on the assignments that we foresaw a dissol- for the year to come. This was based on previous experiences and individual opinions available for the season. What we anticipated to anticipate, however, was the insight derived from the experience of last year and the confidence that characterized the team's play all year long. In this respect we did the team justice.

In registering the finest season in over five years, the Great Danes of Albany chalked up such names as Peabody, Plainfield, Boston College, and C. Os, traditionally strong schools. They did it with a tenacious defense and an often by-passed offense and great amounts of heart and work, but there was no one the team questioned that enabled it to overcome its deficiencies we'd have to trust.

The team seemed to possess great harmony during the entire season, especially showing itself during the three-game losing streak at the start of the season. This is true of a team's potential—when it can maintain a team spirit during a rough start— and the Danes did just that and more. They built themselves into a strong unit as a team—not a team of individuals, although one man dominated the scoring column. It still takes 15 other players to stop the opponent and get the ball to him. Coach Garcia must be proud of his soccer team, as this in sports staff.

There was an error in last Tuesday's A/E regarding Maurice. A check reveals that Maurice played 18 games. The record still belongs to Karl-Henry Pet- terman (19), who scored 26 goals and led the league in scoring last year. Sunday's game between league-leading APA and second-place Danes was to prove a battle, reportedly. Both teams will be at full strength for the game, which is expected to be an exciting contest. The score of that game was 2-1, with APA leading 1-0 at half time. APA went on to win 3-1, with goals from Miller (2) and Smith (1).

In A/E League action last week, a spirited Tower team swept three games, behind a steadfast defense, blanking the Colonials 1-0 on Friday and the Choppers 3-0 on Saturday. It was the only loss coming at the hands of the Danes, who built themselves up as a team and not as individuals. The Danes did just that and more. They built themselves into a strong unit as a team. The score of the game was 2-1, with APA leading 1-0 at half time. APA went on to win 3-1, with goals from Miller (2) and Smith (1).

In AMIA League I action last week, a spirited Tower team swept three games, behind a steadfast defense, blanking the Colonials 1-0 on Friday and the Choppers 3-0 on Saturday. It was the only loss coming at the hands of the Danes, who built themselves up as a team and not as individuals. The Danes did just that and more. They built themselves into a strong unit as a team. The score of the game was 2-1, with APA leading 1-0 at half time. APA went on to win 3-1, with goals from Miller (2) and Smith (1).

Food Service Trials

Although our experimental panes at food service today, we must admit that they have been trying hard to please the students. Last week's sign appeared when indicated that if a dish were not ready, it should be re-cooked to suit the individual taste.

During the weekend's trials, we notice that the tables listing the hours food service offers his services and some of the dishes which food service performs as well as general information. In the Colonial Quad, a lamp has been added to warm, to keep food warm.

Food Service, therefore, is in trial to please.

For more information, please contact the Albany Student Press.

Coordination Encouraged by Student Activities

The New Director of Athletics, Mr. Warren, and A. A. Board have apparently agreed on those broad outlines, although the board wishes to meet with representatives of Central Council to finalize the original bill.

The cooperative attitude of A. A. Board and Mr. Warren are to be commended. With the assistance of Central Council, a workable agreement can be constructed which will satisfy the desires of Central Council, yet allow A. A. Board to function effectively as they have done in the past.

Researchers Needed

Interest in research as an integral part of any university. On this campus, there are professors doing research in all the areas of the natural sciences.

This afternoon Central 17 will bring back to earth samples of microscope slides that have been collected in boxes designated as Dudley Observatory.

But research is not restricted to faculty members or students with doctoral degrees. Many students have been doing a limited amount of independent research on the campus for many years. Harvey Palsamaki's research (a good example of student research) in the present structure. Over a third of students are engaged in research work. The students were completely on their own and received full credit for their achievements.

Presently there is a need for students who wish to do their own research.

Committee Selection

The present system of choosing student representatives for the various faculty-student committees and other positions seems to be a poor one. When students are needed, the president of Student Association or a cabinet member thinks up a likely candidate. Central Council approves the choice without debate.

What is needed is a system whereby interested students are asked to volunteer for these positions. From a list of students, Central Council could choose the one or two best-prepared students that were collected in boxes designated as Dudley Observatory.

But research is not restricted to faculty members or students with doctoral degrees. Many students have been doing a limited amount of independent research on the campus for many years. Harvey Palsamaki's research is a good example of student research.

Byrne Henshaw has encouraged many students to pursue experiments of their own. The students were completely on their own and received full credit for their achievements.

Presently there is a need for students who wish to do their own research.

University Offers Two Courses Via Television For Spring Term

"The course on the Classics" is an upper-division course in ancient civilization and cultures of the Mediterranean countries. The course will be of interest to students who have had Latin and Greek courses. The course will be taught by Dr. John Hemenway, who is a specialist in the field of ancient civilization and cultures of the Mediterranean countries.

Students who wish to take this course must register with the registrar's office at the University of California, Berkeley, and pay the regular tuition and fees. The course will be held on Tuesdays and Thursdays from 2:00 to 3:00 p.m., and will run from January 25 to May 31.

Cagers Open Practice

Coach Lee Rhenish of the Colonials last week announced the opening of practice for the University basketball team. Practice sessions will be held from now through Christmas for the seven returning stars, who will be assisted by five newcomers. Practice will be held at noon each day.

Newcomers include new starters, Bob Stein and John Thume. Bob Stein, a 5-10 senior, was a key member of the Colonials' junior varsity. Stein has been a member of the Colonials' junior varsity since his freshman year.

John Thune, a 6-2 junior, was a reserve last year. Thune, who is also a member of the Colonials' junior varsity, will be a key member of the Colonials' varsity this year.

The Colonials will be one of the teams to watch this year, as they return seven starters and add five newcomers. The Colonials finished last year with a 73-71 squeak in the final game of the season.

Women's Field Hockey

In the final game of a successful season, the Colonials defeated the state champions, the University of Connecticut, 1-0, to win the championship of the New England Intercollegiate league. The Colonials, who finished the season with a 5-1 record, captured the championship for the first time.

The Colonials' victory was due to the efforts of goalkeeper Cindy, who made three saves in the game. Cindy's performance was key in helping the Colonials to a 1-0 victory. The Colonials' other goal was scored by Mary, who received a pass from Susan and fired a shot into the goal.

The Colonials will now prepare for the upcoming season, which begins in January. The Colonials are expected to be one of the teams to watch this year, as they return seven starters and add five newcomers. The Colonials finished last year with a 73-71 squeak in the final game of the season.

Faculty Alumni Association of the University of Albany to present the "Phil Woods Quartet" in a concert at 8 p.m. on Thursday, Dec. 3. The event will be held in the auditorium of the university's student center.

The concert is sponsored by the Faculty Alumni Association of the University of Albany and is open to the public. Admission is free. For more information, call the university's information center at 273-6121.
