State College News

September 1947

To May 1948
An Appeal...

Two State College News is a student-owned and student-operated publication dedicated to the maintenance of high standards of journalistic ethics. It is printed under the supervision of the Department of Journalism and Communications.

Before the year starts and too many assemblies are held, I urge students to frequent the student center, where they can sign up for the sports programs. The P. O. has always been the student center for the P. O. of all students.

To put a stop to this practice. However, all those who frequent the student center are asked to stop and sign up for the sports programs. The P. O. has always been the student center for the P. O. of all students.

No Smoking...

This often raises many questions and the News Office is no exception. The P. O. has always been the News Office of many students. We urge students to frequent the student center, where they can sign up for the sports programs. The P. O. has always been the student center for the P. O. of all students.

The administration has requested that a few questions be raised. The P. O. has always been the student center for the P. O. of all students. We urge students to frequent the student center, where they can sign up for the sports programs. The P. O. has always been the student center for the P. O. of all students.

We are not trying to upset our regular customers, but are trying to bring out the values of a student center. We urge students to frequent the student center, where they can sign up for the sports programs. The P. O. has always been the student center for the P. O. of all students.

Communications

"It's about time. We've been hearing about the student center for the P. O. of all students for years. We urge students to frequent the student center, where they can sign up for the sports programs. The P. O. has always been the student center for the P. O. of all students."

"Koreans Appreciate Attempts At Education," Says Dr. Morris

"Koreans appreciate attempts at education," says Dr. Morris. "The problem is that they are not getting the full picture. The Japanese are often portrayed as villains, while the Koreans are portrayed as heroes. This is not fair to either group. It is important that we present a balanced view of both countries. This will help to promote understanding and peace between the two nations."
