by Bruce R. Maggin

The Albany State basketball team, like many young teams, and just about blew Stony Brook consistency and Harry Johnson together. Led by the Johnson and dribbled downcourt, where was passing and shooting like twenty-live footers with great

was able to take a 14 point lead beautiful play when Harry, the old Harry Johnson. The

for the Danes, the team went fiat and allowed Stony Brook could have led by twenty.

But just as things looked rosy the Danes slowdown plus his accuracy at the loul line con­

Harry seems more relaxed out particularly hurl as Albany's basketball but they retreated enough as they failed to win any

Trevett's movement of the ball the Danes. Albany started play­

the Danes. Albany started play­ing the team had no desire of playing with Gary Trevett's movement of the ball being a prime factor. Quickly moving the Naples points, the Danes guided a narrow lead. They then moved into the losing team, with when several minutes remaining in the contest. Albany from the ball, the Danes continued to improve in the game and scoring. With only eight points, Pitt Mont was to the Danes and saw unplanned action with both Miller and Johnson in back. He will need time to work himself into his role.

Gary Trevett had the problem of adjusting to college ball, but Friday he played probably his best game in a tie. He went in the closing minutes of the game, Trevett stepped in with ten. He was the sixth scoring player in the Danes' victory.

The basketball performance of the basketball team could be partially attributed to the backcourt crew. With a cold arm, the Johnson's championship seemed disabled and they were able to score quickly when Stony Brook momentarily took the lead.

One would think that the cold would go to the Danes, scoring wise. This was not the case as the Albany 25 vs 30 line was a 99 per cent. The Danes will have trouble playing from a team. They had a real leader out on the court. Sometimes it seems that the formations and the basketball are playing two different games at the same time. Tonight may be the one who can quarterback the team. He'll have to show that he can put two good games back to back. The team will need consistent play from everyone.

Tonight the Danes take on Maritime College at the Gym starting at 8:30 p.m. It will be a good test for the Danes before their weekend meeting.

Matmen Face First Defeat; Fail to Pin Cortland

by Kenneth Antinone

The Albany wrestling team took its first loss of the season at Cortland 2-1.

The matmen showed their kinks and got off to slow start having two out of the first three times and managing to draw in the second. The finishers that picked up victories in the last seven matches along with a un­

Gary Johnson after suffering a still very bright baby, noted with some satisfaction. Harry seems more relaxed out on the court and is unable to take the lead by a single point. That enough score was enough to win the game. Albany started play­ing the team had no desire of playing with Gary Trevett's movement of the ball being a prime factor. Quickly moving the Naples points, the Danes guided a narrow lead. They then moved into the losing team, with when several minutes remaining in the contest. Married File Class Action Suit Against SUNY at Stony Brook

by GIL D. POPOVIC

SAC Press Service

An M.S. candidate has brought against the University for being "led to believe that married couples without children, children living in common-law relationships, and children living with their parents" are differently treated. The suit was filed in the State Supreme Court in New York on behalf of all students who have been or will be "denied access to the University for reasons of their marital status or the marital status of their parents".

The suit alleges that the University, in its regulations and policies, discriminates against married students and those who are likely to become married.

GA펠 to tell in-person and to file with the United States Department of Education, "as required by applicable law," the regulations and policies of the University as they relate to the marital status of students.

The suit seeks "a permanent and prospective judgment and declaration that the University's regulations and policies bear no relation to any educational decision, and that the University is required to provide equal access and equal protection to all students with respect to all educational decisions."
Dangerous Toys Studied By NYPIRG

By Dennis Esposit

In a bid to study a few of thousands of toys which cause damage and joy and delight at Christmas and throughout the year, the Albany Student Press, SUNY Albany, and the Environmental Protection Agency (EPA) held a safety survey of dangerous toys this week. The survey was conducted in conjunction with a 50,000 name campaign to halt these senseless tragedies

The Albany Student Press has received complaints from the Department of Consumer Protection Agency in Albany State University that certain dangerous toys be removed from the sale of dangerous toys has been

The most remarkable and potentially successful aspect of the program is when the students returned to the Albany Student Press and the Consumer Protection Agency in Albany State University to report the findings. The students were reported to have found the children's favorite toy was the dangerous toy.

Wilson Sends Cautionary Budget

by Glenn van Nest

Governor Wilson sent the legislature a modest $3.9 billion budget Tuesday that consists of a major spending initiative or tax relief. The state's budgets have been increasing recently to meet current needs and growing federal aid needs. The proposed budget totals $3.9 billion, which is a 2.5% increase from last year's budget.

The budget includes an increase of $200 million for education, $100 million for health care, and $50 million for transportation. The budget also includes $40 million for economic development and $30 million for public safety.

The budget is designed to be fiscally responsible while still addressing the state's needs. The governor has called for a balanced budget and has emphasized the importance of fiscal discipline.

The budget also includes a proposal to increase the state's retirement system contributions, which will help ensure the retirement system's financial stability. The governor has also proposed a freeze on state employee pay raise proposals.

The budget is designed to be sustainable and to continue to grow at a steady pace. The governor has stated that the state's economy is strong and that the budget can accommodate these increases.

Duryea, Anderson Urge Aid Changes

by Robert Dushner

The two most important issues in this year's New York State Legislature are the budget and the proposed education aid plan. The budget is expected to be released soon, and the education aid plan is due by next week.

Duryea and Anderson are calling for changes to the state's education aid plan, which they believe is not addressing the needs of New York's schools.

They propose increasing the state's share of education funding, which would allow schools to have more control over their budgets and to allocate resources based on their needs.

They also propose expanding the state's education aid formula to include more factors, such as student poverty and special education needs.

The budget and education aid plan are expected to be debated in the coming weeks, and Duryea and Anderson are hopeful that their proposals will be considered.

The state's budget is due by next week, and the education aid plan is due by next week. The state's budget is expected to be released soon, and the education aid plan is due by next week.

Twisted Psyche Strikes Again

By Steve Klein

With the holiday season in full swing, the variety of options available to the public is vast. One option that has gained popularity is a mental health treatment called "Twisted Psyche," which is an innovative approach to treating mental health issues.

Twisted Psyche is a unique method that combines traditional psychotherapy with modern technology. Participants are given headsets that allow them to enter a fully immersive virtual environment. This environment is designed to help individuals overcome their fears, anxiety, and other mental health challenges.

The program is divided into several stages. In the first stage, participants are introduced to the concept of "Twisted Psyche" and how it can help them. The second stage involves a series of interactive sessions where participants work with a therapist to identify their specific mental health issues. In the third stage, participants enter the virtual environment and engage in scenarios designed to help them overcome their fears.

In conclusion, Twisted Psyche is a promising new approach to mental health treatment that offers a unique and innovative way to help individuals overcome their mental health challenges. It is an exciting development in the field of mental health and offers hope to those who are struggling with mental health issues.

Fantasies & Loose Eccentrics

Further celebrations opened the wet-screen season scheduled for the 1973-74 season at New York Academy of Art Museum on Jan. 25. The film selected for the opening night, "Rising Smile," directed by an unknown director, was a small but significant work. It dealt with a group of women who are on the verge of divorce. The film was shot in a small New York City apartment and focused on the relationships between the women.

In the film, the women are portrayed as strong and independent. They are not afraid to speak their minds and make decisions. The film is a realistic portrayal of the divorce dilemma, and it is worth watching.

Relaxation Through Meditation

In his multi-million dollar sun, Michaelangelo, much history of our nation was photographed. However, it is time to look for brighter images. The past 50 years have been a time of social and cultural change. The world of the 1970s has been more open to new ideas and experiences. This has led to a greater emphasis on personal growth and well-being.

Relaxation through meditation is one of the most effective ways to achieve this. Meditation is a practice that has been used for thousands of years. It is a way of quieting the mind and observing the present moment.

Meditation is a simple practice that can be done anywhere. It is a great way to reduce stress and improve your overall health. It is a practice that can be done alone or with others. It is a practice that can be done for a few minutes or for hours.

Relax With Meditation

Although the findings of Bowen and Walker appear to show a significant influence of psychological factors on drug addiction, the possibility exists that environmental and social factors may also play a role. For example, it has been suggested that drug addiction may be more prevalent among individuals who have experienced early childhood trauma or who come from disadvantaged backgrounds. Furthermore, the presence of supportive relationships and a sense of belonging in a group can provide a protective factor against the development of drug addiction.

One would expect such psychological changes to alter attitudes and behaviors, and these changes can occur gradually or rapidly. In an exploratory study of drug addiction, researchers found that individuals who had experienced previous treatment had significantly fewer relapses than those who had not. This suggests that treatment programs that focus on addressing the underlying mental and emotional issues associated with addiction may be effective in preventing relapse.

It is also worth noting that the relationship between drug addiction and mental illness is complex and multifaceted. Some individuals may develop drug addiction as a way to cope with underlying psychological problems, while others may use drugs to exacerbate existing mental health issues. Understanding the nature of this relationship is crucial for developing effective treatment strategies.

If the present substantial evidence is correct, family-oriented programs should be able to make an important contribution to addiction treatment. The Family Network of America, for example, has developed several programs that focus on family therapy and education. These programs aim to help families understand the patterns and dynamics of addiction within the family system and provide skills for supporting and managing addiction.

The Family Network's programs are based on a model of family therapy called the "Family Therapy Model." The model emphasizes the importance of involving all family members in the treatment process and addressing the family system as a whole. This approach recognizes that addiction is a family issue and that recovery is more likely when the family is able to work together effectively.

In conclusion, while the evidence on the relationship between drug addiction and mental illness is still evolving, it is clear that addressing the underlying psychological and emotional issues associated with addiction is crucial for successful treatment. By focusing on both the individual and the family system, family-oriented programs can provide an effective approach to addiction treatment.

Benedict to the Rescue

To the Editor:

The Duany Correctional Institution is scheduled to open a new branch in the near future. It is hoped that this will be a step in the right direction for the rehabilitation of prisoners. The new facility will provide better living conditions and educational opportunities for inmates. The staff is dedicated to helping the prisoners return to society as productive citizens.

The Devil

Made Me Do It

To the Editor:

I am writing to express my concern about the recent events involving the Devil. It seems that the Devil is once again causing chaos and destruction. The recent sighting in the town of Devil's Peak has sparked fear and speculation among the residents. The Devil is known for its ability to manipulate and deceive, causing those who come into contact with it to commit heinous acts.

Where There's Smoke...

To the Editor:

I recently read an article about the dangers of smoke and air pollution. The article highlighted the ill effects of smoking on both the individual and the environment. It is crucial to raise awareness about the危害 of tobacco use and advocate for smoke-free policies.

Moving The Inexorable To The Inevitable

President Nixon has announced that he will resign from office on August 9th. This decision comes after a long and tumultuous period for the President, marked by the Watergate scandal and the impeachment proceedings.

The Devil in the Details

One of the key figures in the Watergate investigation is the Devil, who is believed to have played a role in the conflict. The Devil's involvement raises questions about the nature of evil and its influence on human affairs.

President Nixon's Resignation

President Nixon has announced his resignation effective August 9th. This decision was made after years of legal battles and personal struggles, culminating in the resignation of several top officials, including the President himself.

The Devil's Role

The Devil has been implicated in various events, including the Watergate scandal. The Devil's actions and motives are the subject of much speculation and debate.

The Devil's Horn

The Devil's horn has become a symbol of his power and influence. The horn is said to be made of brass and is often depicted with a red base.

South of the Border

The border between the United States and Mexico is a complex issue, involving political, economic, and social factors. The recent surge in immigrants and drug trafficking has further complicated the situation.

The Invisible Man

The Invisible Man is a character from H.G. Wells' novel. He is a creature who can become invisible at will, causing fear and intrigue among those who encounter him.

President Ford

President Ford has been a significant figure in American politics, serving as the Vice President under President Nixon and then as the President after Nixon's resignation.

The Devil's Advocate

The Devil's Advocate is a character from the movie of the same name. He is a devilish figure who acts as an advocate for the Devil, presenting his arguments and motives to the court.

President Ford's Resignation

On October 15th, President Ford announced his resignation, effective November 21st. This decision was made after a period of intense political pressure and controversy.

The Devil's Advocate (Movie)

The Devil's Advocate is a 1997 American crime drama film directed by Martin Scorsese and produced by Columbia Pictures. It stars Al Pacino as the Devil's advocate for the court.

The Invisible Man (Book)

The Invisible Man is a 1897 novel by H.G. Wells. It tells the story of Alexander Keaton, a scientist who becomes invisible after a scientific experiment goes wrong.

The Invisible Man (1931 Film)

The Invisible Man is a 1931 American horror film directed by James Whale and produced by Universal Pictures. It stars Claude Rains as the invisible man.
It's hard to say whether it was the wind or maybe the same cloud of dust that brought the thinking of 'Hadley's War' and the image of 'collegium.'

It much had to do, however, in the way a man and woman could be seen as a team and stand together and be a team for the good of all. That evening, 'Sarge' came over to the radio and said, "They're taking me out of here."

Actually, he was out of the sump holes. We got shovels, and after I got in, I had my helmet. He was going to keep us from the battle. I was too delighted to get into the helmet, and it wasn't a helmet. As the war was ending, I didn't know what he wanted or why. It was some kind of habit.

I repeated, "Where is your hat, soldier?" At first, I thought he was concerned about the hat. He smiled, and in a fairly courteous military manner, he said, "My hat is on my head. Sir." I had no idea what was going on.

He repeated, "Where is your hat, soldier?" I wasn't really listening to the Captain, but finally, the Captain came over and asked, "What is the plan?"

"I wasn't quite sure," I thought. "I just knew that it was some kind of a team." And when it came our turn, each of us would have a single line leading to the Captain's table, and when it was done, we would be allowed to go. And it was our turn.

From the very early stages, I realized that we were not alone in our pain and suffering. We were not alone in our grief and loss. We were not alone in our hope and our future. We were not alone in our dreams and our visions. We were not alone in our struggles and our battles.

And so we went on, building upon this foundation of hope, courage, and determination. And we continued to build, to grow, and to learn. And we continued to support each other, to help each other, to lift each other up.

It was our job to make the round holes square, and this we did day after day.

Defense Leads Danes to Victory Over Marist

**by Harvey Kepe**

Displaying what one observer coined a "drativ- field performance, the Albany State defense led the unbeaten Marist College. According to the final margin of 18-14, the Danes forced the college into a situation where they could not compete against the Danes' level of play. The Marist defense, otherwise poor, was basically ineffective, hitting for 14 points compared to the 18 points scored by the Danes. The Marist defense was the key to the Danes' victory.

**J.V. Impressive Victors**

**by Harvey Kepe**

I tell by game and support high 14 points. The Albany State defense was absolutely effective from beginning to end. The Marist defense, generally poor, was basically ineffective, hitting for 14 points compared to the 18 points scored by the Danes. The Marist defense was the key to the Danes' victory.
