NEWS BRIEFS

Soviets threatened (AP) - Radio Moscow announced Saturday that it was restoring U.S. diplomatic relations with Afghanistan, which Moscow said it had severed in 1979 because of the Soviet invasion. The announcement was made at a time when the United States and the United Nations are pressing the Soviets to withdraw their troops from Afghanistan. The U.S. government has not yet responded to Moscow's announcement.

Baker eyes savings (AP) - Treasury Secretary James A. Baker III said Saturday that the government was making progress in reducing the budget deficit, but he warned that further savings would be difficult to achieve.

Kodak plans appeal (AP) - Eastman Kodak said it will appeal a federal court order that barred it from making classified research. It's that way with most classified research. It's that way with most classified research.

Students offer varied views on divestment

By Pam Conway

Among the nearly two dozen dollars for divestment, only one研究 aired on a radio audience, as the authors of several Soviet states have said. One study, conducted in New York City, found that about 300 people had participated in such a rally.

The State

State examines AIDS

Albany (AP) - The state Department of Health said Saturday that it would start testing blood samples from New York City residents for the AIDS virus. The state health department has ordered more than 250,000 residents in New York and New Jersey to be tested for the virus.

Career Day may open doors

By Andrea Corder

While all students seemed to be opposed to the divestment movement, some, like sophomore Jeanne Benecke, said, "I don't know too many people who are against it. But those who did participate were convinced that divestment would pressure the South African government to change their policies.

Career Development Center Assistant Director Chris DiSanto, added that a faculty member of the Physics Department, neither could be reached for comment.

STAFF WRITER,
COLLEGE PRESS SERVICE—Some campus may pull out of one of the largest university research projects backed by the Strategic Defense Initiative. The administration at the University of Illinois at Urbana-Champaign is reviewing the terms of the federal contract for the research project on atmospheric phenomena, according to Dr. Robert Longobucco, acting vice president for research. The university is one of the few campuses that have not been approached by SDI officials about the project. The university is interested in the SDI project because it is a major research institution in the area of atmospheric science. The administration is reviewing the terms of the contract to ensure that the university's scientific freedom is not compromised. The university is also concerned about the potential financial benefits of the project. The administration is working with the SDI officials to ensure that the university's scientific freedom is protected. The administration is also working with the SDI officials to ensure that the university's financial interests are protected.

Chorus Line kicks at Proctors

I saw A Chorus Line on Broadway several years ago. I thought it was a good production, but it was clearly not the best of the genre. If you haven't seen it or if you've forgotten why it's considered a classic, let me remind you:

The show is known for its innovative staging and its exploration of the lives of chorus dancers. It tells the story of a group of performers who audition for a Broadway musical and are eventually cut from the show due to their lack of talent. The show is a powerful commentary on the nature of talent and the role of luck in the entertainment industry.

As a result, I was excited to see the touring production of A Chorus Line at Proctors. I had heard good things about it, and I was curious to see how it compared to the original Broadway production.

The cast was impressive. It featured a mix of well-known and up-and-coming performers, all of whom delivered strong and convincing performances. The choreography was excellent, and the music and lyrics were as memorable as ever. The show's message about the nature of talent and its importance in the entertainment industry was still relevant and powerful.

Overall, I had a great time at the show. If you're a fan of musical theater or just want to see a good production, I would highly recommend checking out A Chorus Line at Proctors.
Making compromises

Last week, Mike Alvarez, Albany’s director of Community Relations, informed us that he’s got 132 hours to deal with the University’s lost funding. That means tomorrow, if he wants to.

At the moment, one thing is for certain: a compromise will have to be made in order to do the right thing.

Enforcement is an easy out right now, but what about next month, or next year? SA relations with the University Administration have been strained for some time, and are likely to be further strained in the months to come.

For instance, enforcement means of buying time. As SA President Steve Goldberg pointed out last Thursday, “We’re just asking that you give us enough time to resolve it.”

The tax on the special education needs of students with disabilities.

A Democratic appeal

We are calling on all America’s students to demand that the University make a commitment to support the disabled students on campus. This will require our party to take action in a number of areas:

1. We need to make sure that the University is aware of the needs of disabled students on campus.
2. We need to make sure that the University is committed to supporting the disabled students on campus.
3. We need to make sure that the University is committed to creating a safe and inclusive learning environment for all students, including disabled students.

Thank you, UPD

To the Editor:

I have had several experiences with UPD and every single one of them has been a nightmare. I have been locked out of my dorm, lost my keys, and had to wait for 2 hours to get my car from the UPD's garage. They are not helpful and they never seem to do anything right.

I would like to see UPD change for the better and become more helpful to the students. I believe that they should be more responsive and do their job properly. They should be more professional and work harder to make sure that the students are safe and secure.

Appalled at Sorenson

To the Editor:

I was appalled at the comments made by Mr. Sorenson in his recent interview. It is not appropriate for someone in his position to make such offensive remarks. I urge him to apologize for his actions.

The ASP is accepting applications for editorial pages editor

The job takes 15 hours per week, requires campus and national political awareness, and is a paid position. Submit application and writing sample (a term paper is fine) to Managing Editor, University Campus Center, 3rd Floor, Suite 329.
The delay is "a kind of very unpleasant experience," Nica says. "We have to wait a long time to see something that we have paid for."
ASSOCIATING WITH ‘SUBVERSIVES’ COULD FORCE PROF OUT OF COUNTRY

COLLEGE PRESS SERVICE—University of New Mexico assistant professor Margaret Randall is being told that she cannot stay in the U.S. because she possibly associated with some ‘subversives’ during the past 23 years in Latin America.

Randall, a native of the U.S. who is a Mexican citizen, has parents and a husband who are U.S. citizens. But now she thinks the government may force her to go away and not return, because she is associated with ‘subversives.’

Randall became a naturalized Mexican in 1966, and her attorney, after the appeals for permanent resident alien status in the U.S. were denied, is planning to appeal to higher courts.

The U.S. Immigration and Naturalization Service (INS) officially denied her application for a green card on October 17.

Randall, now 47, has been an assistant professor at the University of New Mexico for the past three years. She has worked in Latin America since she was 23 years old, first as a field organizer for the Nonviolent Investigation Group and then as a professor in Brazil.

Randall has written several books on Latin American politics and has been involved in various political organizations, including the Committee in Solidarity with the People of El Salvador (CISPES) and the Network in Support of Democracy in Latin America (NSDLA).

Randall has also been a member of the United Farm Workers of America (UFW) and has worked with the Anti-Imperialist League (AIL) and the Committee to Defend the Rights of Latin Americans (CDRLA).

Randall is currently being represented by the law firm of Maggio, Silverstein & Kornbluth, which specializes in immigration law.

Randall’s attorney, Michael Maggio, who, like Randall, has been denied permanent resident status before, said that the INS has been “prejudicial to the public interest” in its treatment of Randall.

Maggio said that he expects the INS to reject Randall’s application for permanent resident status, but that he will appeal the decision to a higher court.

Randall’s case is one of many that are currently being reviewed by the INS. The INS has rejected about 253 applications for permanent residency status for political reasons in the past, according to figures compiled by the State Department’s Bureau of Consular Affairs.

As in the Brutus case, Randall has at least one year left to file a lawsuit to challenge the INS’s decision. Randall’s application for permanent resident status was denied in 1990, but she has since filed an appeal to the Board of Immigration Appeals (BIA).

The BIA has ordered the INS to re-evaluate Randall’s application for permanent resident status, but the INS has not complied with the order.

However, Randall’s attorney, Maggio, said that he expects the INS to reject Randall’s application for permanent resident status, but that he will appeal the decision to a higher court.

Another audit by Regan said that the SUNY College of Environmental Science and Forestry in Syracuse failed to adequately control cash receipts of almost $3 million per year.

The audit, covering a period ending in June 1984, said that employees had too much control of money, opening the way for possible employee theft. The report recommended that duties relating to handling cash, recording transactions, and preparing checks be split up among more employees.

In a written response to the sabbatical audit, SUNY officials said that "we believe that, as a whole, the State University and the faculty have made wise and appropriate use of sabbatical leave privileges, and that the campus administrations have been vigilant in conforming to the Trustees' policies concerning the granting of these leaves."

The SUNY response said that "99.3 percent of the faculty who were granted sabbatical leaves satisfied all of the eligibility requirements, and 99.1 percent satisfied the obligations to return for one full year at the conclusion of their leave."

The response said that about 90 percent of the required reports by those who took sabbatical leaves were completed before the audit period ended last December and said that since then, 99 percent of the reports have been completed.

SUNY officials said that "the University has seriously considered the comments provided in the audit report and has established new administrative procedures to provide the appropriate corrections."

In response to the audit on the SUNY college in Syracuse, SUNY officials issued a statement saying there is no evidence that employees have taken or improperly spent money.

SUNY officials said that under ideal conditions they could separate the job of dealing with money among more employees but said that "with our current staffing level and level of workload, it is not possible to implement suggested changes and still maintain a timely operation."

The officials said they are developing a computer-based student account system designed to improve operations.

Grouper law

After arriving forty-five minutes late, Alvaro addressed the group saying that "my job is to enforce the Grouper Law to get safe, clean, quiet neighborhoods." He said he is willing to "give Steve a chance," but he won't let the community "put up with what it's been putting up with for so long." Alvaro, speaking in Albany, added, "the University's responsibility."

"They exist but do not help. We're tired of being woken up at four in the morning. Something must be done."

SUNY sets AIDS contingency plans

By Ken Dornbaum

The camps which will undergo the greatest change in terms of housing, activities, and meal services will be the maximum-security unit on the north campus and the minimum-security unit on the south campus. The maximum-security unit will be converted to a medium-security facility, and the minimum-security unit will be converted to a maximum-security facility. The medium-security unit will remain a medium-security facility.

The Department of Transportation publishes an "Occupational Awareness Minibrief," which reviews "the nature of work, the working conditions, and the training and education needed to get into and advance in this field." The minibrief includes information on job outlook, wages, and the need for on-the-job training. The minibrief also includes a survey of job openings in the transportation industry, including truck driving, bus driving, and train driving.

The minibrief concludes with a list of resources for those interested in pursuing a career in transportation, including the Occupational Outlook Handbook, the National Transportation Association, and the American Trucking Associations. The minibrief also includes a list of transportation-related careers and a list of colleges and universities offering transportation-related programs.

The Department of Transportation recommends that individuals interested in pursuing a career in transportation take courses in mathematics, science, and English. The minibrief also recommends that individuals interested in pursuing a career in transportation participate in summer job programs and internships.

The Department of Transportation also recommends that individuals interested in pursuing a career in transportation consider obtaining an industry-recognized certification. The minibrief notes that the American Trucking Associations offers a variety of industry-recognized certifications, including the Professional Truck Driver Certification and the Safety Manager Certification.

The Department of Transportation also recommends that individuals interested in pursuing a career in transportation consider obtaining a job in the transportation industry. The minibrief notes that the transportation industry offers a variety of job opportunities, including truck driving, bus driving, and train driving.

In conclusion, the Department of Transportation recommends that individuals interested in pursuing a career in transportation take courses in mathematics, science, and English, participate in summer job programs and internships, consider obtaining an industry-recognized certification, and consider obtaining a job in the transportation industry.

Dorm rate increases feared as SUNY votes on self-sufficiency plan

By Karen E. Bercer

Students may have to pay more for room and board if SUNY votes on the self-sufficiency plan, which would allow SUNY to charge tuition and fees as it sees fit, rather than relying on state funding.

The self-sufficiency plan would allow SUNY to charge tuition and fees as it sees fit, rather than relying on state funding, which is currently a major source of revenue. The plan would allow SUNY to charge tuition and fees based on market demand, rather than state mandates, which have limited SUNY's ability to offer a diverse range of programs.

The self-sufficiency plan would also allow SUNY to charge tuition and fees based on the cost of providing education, rather than state mandates, which have limited SUNY's ability to offer a diverse range of programs.

The self-sufficiency plan would also allow SUNY to charge tuition and fees based on the cost of providing education, rather than state mandates, which have limited SUNY's ability to offer a diverse range of programs.
