For The Good ...

One of the most outstanding features for which State has been commended is the number of other colleges that have new and well-organized assembly groups. Our assembly program is still growing, but it is needed because the towns in this area are now being organized. Through the work of the Education, Science, and Technology Committee, a program of talks that will engage the interest of the community is being planned.

The well thought out general meetings of the past will probably continue through the school year and improve by public exhibition by personalities. A meeting that discusses the social issues is now being formed, and the officers of the Student Association and the officers of the class have now become a part of the Student Association.

For The Good ...
