BASKETBALL SEASON TO OPEN TOMORROW

"Wonder Five" After Two Wins Meets At Albany In 4 Veterans

STATE HAS SAME LINEUP

golf Will Jump Center, Carr

AND Kuczynski. Forwards, IN Battle

In 11th Night Match Under Their Belt. The State College basketball team will hit the road tonight against the Maxwell Association. At the noon school on Tuesday. The Maxwell team comes to Albany with a reputation to live up to, having been burl "The Wonder Five" in New York City last month. The Maxwell paper quotes several experts "Maxwell seems destined for a grander victory than that of last year. We are of the opinion that the wonder team of last fall will be surpassed."

The Tigers will have a winning streak of straight wins established in the last two seasons at State. Autumn has brought another season of the Maxwell association. In the fall it won the first four games of the season. With the same two exceptions the State team will be the same as in the games of the past two years.

With one exception the State team will have the same as in the last two seasons. The one exception is the loss of a veteran. The in-state school on Tuesday will be the first time that Lawwill and the State will start at the same time. It will probably be a long and close game. That the Tigers will start at noon will probably make the game more popular.

The Maxwell team has been playing in state for the past several weeks. They have a reputation for being hard to beat. The game will probably be a hard one. The loss of the veteran is a slight one in the game. From an all-state point of view the game may be hard to beat. The Tiger's offense will be the best point to watch. The game will certainly be a winner.

WHEN XERXES WENT

The great Persian ruler gazed from a hilltop upon his vast army of a million men. It was the largest army that had ever existed. And when he turned away with tears in his eyes because in a hundred years all trace of it would be gone. That army was a symbol of power, destructive and transient.

Today in one machine, now being built in the General Electric Company, is contained the muscular energy of two million men. This great machine, a steam turbine, is also a symbol of power—a new power that is constructive and permanent.

Its unprecedented size, a record in construction of such machines, is a pledge to the people that the electrical industry is on the march, ever on the alert to supply plenty of electricity at a low cost to all.
