Praise the Lord—
(But Pass Us Some Validation)

It seems to me that this is an early sign that the committee appointed by Dr. John M. Berzins, President of the College, to advise me on the future of physical education, has been made ready. As you are aware, we have been looking into the possibility of expanding our physical education program in order to meet the needs of our students and to provide a broader range of opportunities for physical activity. This committee has been working diligently on the project, and I am pleased to announce that they have made some recommendations that I believe will be beneficial to our students.

The committee believes that we should expand our physical education program in the following ways:

1. **Increase the number of courses offered:** We will consider adding more courses to our current offerings to provide more options for students.
2. **Enhance the curriculum:** We will work to improve the current curriculum by incorporating new and innovative teaching methods and incorporating new technologies.
3. **Expand the facilities:** We will consider expanding our physical education facilities to accommodate the increased student population and provide better facilities for our students.

I believe that these recommendations will help us to provide a more comprehensive physical education program that will meet the needs of our students.

I am grateful to the committee for their hard work and dedication to this project. I look forward to working with them to implement these recommendations and to continue to improve our physical education program.
