QUINTET TO MAKE WEEK-END TRIP

State Will Play Clarkson and St. Lawrence

After witnessing the severe test of the three-game New York trip in fine style, the Purple and Gold quintet is holding specific sessions every night in preparation for the two-game trip to the northern part of the State this week-end. Friday the team will meet Clarkson at Fowdons, and Saturday the line-up will go to Canton, where the team will remain until the game against St. Lawrence takes place on Sunday. Clarkson will be the first game of the two-game week-end for the Purple and Gold quintet, the next day St. Lawrence will meet the Aggies in Canton.

The men who will make the trip are Hathorn, T. Cassavant, Johnston, H. Polt, Dobris, Baker and Linck.

QUARTERLY NOTICE

All material for the March issue of the "Quartely" must be in this week. A copy of the board's calendar is now being stamped in the office, which will be placed in the hands of all members of the college. The board asks you to cooperate in getting this number out before the spring recess.

STATE BEATS PRATT
Wins in Overtime Game

State College gave Pratt its second defeat on Pratt's court Friday night in an overtime game by a score of 31-28. In the first half State trailed all the way, due to the strong play of the opposing team. The half ended 14-9, with State on the short end of the score.

The second half saw State come back strong and tie the score, which held to the end of the game, necessitating an extra five-minute period. In this half Cassavant and Hathorn were the outstanding men for State.

In the extra five-minute period Cassavant was the principal figure on the court. He dropped in a field goal and a foul shot, while Hathorn also contributed from the field. Leary scored for Pratt. State dropped in two more from the field and came from the foul line, while the best Pratt could do was to score once from the field.

Cassavant was in the points for State, while Schlamon and Macintosh excelled for Pratt.

STATE LOSES TWO GAMES

State played Thursday night at Syracuse, Conn., against the Connecticut Agricultural College, and although they played a remarkable game, State cut loose with the whistle and scored four points before the Aggies came to life. Alexander scored a foul shot for the Aggies which took the lead, followed by two more field goals by Dean and Alexander, placing the Aggies in the lead. During the remainder of the half the lead passed from one team to the other. The game was won by a score of 14 to 12, with the Aggies in front.

In the second half, which was termed by the Fritts, proof-readers and assistant editors of three college publications: the "News," the "Quartely" and the "Pelagics," on this account the audience would be as approaches one in that it contained fellow-workers of the speaker.

Mr. Howe said: "I deeply appreciate the honor of addressing the students of the State College for Teachers, under the auspices of its Department of Journalism. As a veteran newspaperman I am always delighted to listen to the address of a college class in journalism or of the popularity and prosperity of an older class, because the course of study and training here supplied is in every way a long-standing and urgent need of our profession."

He further said: "Newspapers belong to one of the most democratie of professions in that this profession is the easiest to enter. To induce talent, price, paper and ability to write a good story the greatest. The work is distinguished from other fields by the fact that there is no preparation or test for the newspaper earphone. He proves his right to remain later. The opportunities for advancement are free."

ATHLETIC COUNCIL PROPOSES A CHANGE OF COLORS FOR STATE COLLEGE

Student Body to Decide Whether Purple and Gold Will Remain

Question to be Discussed - March 11th

In a meeting with Dr. Brubacher in the president's office Wednesday, February 22, the Athletic Council presented the consideration of a change in the colors of State College, but the student body voted in favor of retaining the present combination. Among the schools mentioned are at least five secondary schools in the area, and the Christian Brothers Academy, Cathedral Academy, La Salle, St. Bernard and the Johnson High School. This fact makes it hard for the local school administration, which is the Bishop, to make a decision. St. Lawrence has found that when returing the colors purple and gold one is not a good one for the state college. Consequently it was washed without running and changing to nearly all the colors of the rainbow.

Another reason for the proposed change was that one of the schools mentioned is the Johnstown High School. In a meeting with Dr. Brubacher the question of the colors was brought up in order to all orders for basketball, hockey and baseball equipment. Purple and Gold are not stock colors, and when they are obtained the purple especially is not a good one for the state college. Consequently it was washed without running and changing to nearly all the colors of the rainbow.

PHYSICS DEPARTMENT CERTIFIES AND TIME SIGNALS

Student Body Invited to Hear Concerts and Time Signals

Under the special direction of Mr. Long, the Physics Department of State College has perfected a wireless station in the Department offices, so equipped that messages from great distances are transmitted and amplified, so that they can be heard in the Biology Department at the College and in the second floor corridor in the Science Building. State College and the faculty and students of the college may share in the benefits of the wireless station, a shelf has been fixed outside the door of Room 154 on which the horn of the receiving apparatus will be placed so that anyone who wishes may hear the accurate time signals from Avington, Virginia, and set his watch accordingly. These signals are in the use of the color system of dots and dashes. Beginning five minutes after the hour a dot is transmitted every second except for the twenty-second of the minute and the fifty-second of the minute. The last minute before noon a dash and a dash and a dash are transmitted every second except for the twenty-second of the minute. The last minute before noon a dash and a dash and a dash are transmitted every second except for the twenty-second of the minute and the fifty-second of the minute.
before you for consideration a proposal to change the colors.

This is a question vital to everyone at State College. How are you going to decide it? Up to the present no definite meetings have been held, either by the students or the faculty and some students themselves cannot agree. It seems that colored flags play a part in entertaining and not for anything of profounder discussion involving the college welfare. Here, then, is your great opportunity to correct this impression.

And, in the meantime, if you have something on the subject, write to the News.

GRADUATE ATHLETICS MANAGER SUGGESTED

With the development of a permanent athletic policy at the College a graduate manager becomes a necessity. Heretofore each manager, when he assumed control, entered on his work with no experience. From year to year it was a succession of annual meets, not a well-developed continuous scheme. A graduate manager will provide the needed continuity and link between the seasons. The man chosen should be a member of the Athletic Council and a graduate of the College. A man in this position can be a very great help to the development of the athletics of the College, assisting the student managers in avoiding mistakes so easily made in distributing funds he would be able to direct the student manager so that much loss would occur and the greatest benefit could be derived from the expenditures.

COACH SMATHERS.

DEAN HORNER TO ATTEND INAUGURATION

Dean Harlan H. Horner will accompany the four winners of the Rotary Club contest on their trip to Washington. The All College Rotary Club will pay all expenses of the four successful contestants in the speaking contest on a trip to Washington to witness the inauguration of President-elect Harding. The trip will be made in two stages and the expenses of the trip are: Charles I. Fawley, Milne High School, North Babylon; Alfredo Oswald, pianist.

MUSIC OF ALL NATIONS' CONCERT TO BE GIVEN MONDAY NIGHT

The fourth concert of the series in connection with the extension course, "Imaginative Backgrounds and Home Land," will be given Monday night, March 7 at 8:15 in the Schenectady High School Auditorium, under the auspices of the New York "Globe." There will be an especially well-organized program, represented in the music of all nations.

"Music of All Nations." Among the artists who will take part are Mr. Alfred Oswald, famous lieder pianist; Miss Winifred Marshall, prima donna of the city of American Singers, who has given several seasons of English at the Park Theatre in New York; and Miss Carlotta Ippolito, well-known Italian violinist. Charles D. Isaacson, editor of "Our Family Music," will introduce the music of all nations. The concert will be followed by a business meeting and informal party at the House Saturday night.

STATE COLLEGE NEWS, MARCH 3, 1921

THE PURPLE AND GOLD

In considering the proposed change in colors for State College many persons have set forth the idea in which such a move would be beneficial. It was argued that more distinction would be given the college by such a change. To-day it was shown that athletic supplies could be purchased more readily and more reasonably, and that the eyes on these goods would be more permanent. And the only objection offered against red, blue, purple and gold was simply that these colors have been a part of State College for a long time and a great deal of tradition and sentiment is attached to them.

But, in all seriousness, is it not true that to-day we are in contact with an age which is the American and which is the world in general? If a proposal were made to change the colors of the Stars and Stripes because other countries use the same combination, do you suppose true Americans would leave Betsy Ross and her feelings out of the argument? Of course the Stars and Stripes are much dearer to State College students than the Purple and Gold, but nevertheless there is some degree of comparison. Just suppose that the world were turned over to the Stars and Stripes and the nation of the familiar sentiments of home and mother, what a queer thing life would be?

So in deciding this matter shall we vote some students' pet and to the person who says, "I have no real reason for not changing the colors, except that I like purple and gold," it is true that we are in a great love and respect for the Purple and Gold.

STUDENT DISCUSSION

Students, now is the time for you to prove the wisdom of the student vote in Friday morning Assembly! On March 12 there will be brought to

GEORGE FRANKLIN TO ADDRESS PRESS CLUB

Former State Superintendent of Prisons to Speak

On Monday, March 7, at 2 o'clock, in Room 101L, Mr. George W. Franklin of Trujillo spoke on the members of the Press Club. Mr. Franklin is the publicity director for the Republican State Committee and is a candidate for the State Senate from District 6.

CHI SIGMA THETA CONVENTION

The Sorority held its first annual convention February 25-28 at the Albany Chapter House, 193 Lancaster Street, following delegates from Beta Chapter, Athens, Georgia University, attended: Lona Le Tart, Miss Katherine Green; Miss Elizabeth O'Hara. The festivities of the week-end began Friday night with a theater party at Hannams Hotel. A business meeting was held Saturday afternoon and Sunday evening, followed by a musical at the Hampshire. The alumnae who attended were: Miss Anne Brown, Mrs. Paul Model, Miss Anna Cremar, Miss Laura Gorman, Miss Magdalena Andino, Miss Mary Kinna, Miss Catherine Hager, Miss Anna Quinn, Miss Katherine Green, Miss Charlie Lynney, Miss Helen O'Brien of the toast of "Welcome"; Miss Katherine McFarland, the toast of "Beta"; Miss Helen O'Brien, the toast of "Epsilon"; Mrs. P. Moskot, the toast, "Chi Sigma Cornelia Allen Clear," the toast, "The Future." An informal party at the House Saturday evening brought the convention to a close.

WHO'S WHO

STATE COLLEGE NEWS, MARCH 3, 1921

THE EPH CELEBRATES TWENTY-FIFTH ANNIVERSARY

The Eph Sorority held its alumni reunion last week-end of February 25-27 in celebration of its twenty-fifth anniversary. Over thirty alumnae occupied the week-end in Albany, including Mrs. Axt, a charter member of the sorority; Mrs. Edith Haas Colson, Miss Dorothy Foster, Miss Dorothy Mathews, Miss Dorothy Smith, Miss Geraldine Murray, Miss Helen Creecy, Miss Josephine East, Miss Patricia Burchfield, Miss Harriet Church, Miss Hazel Byers, Miss Helen Laramore, Mrs. Miss Florence Van Ness, Miss Elizabeth Archbold, Miss Annie Conover, Miss Helen Layton, Miss Lila Chamber, Miss Helen Selkirk.

Saturday afternoon an anniversary luncheon was held at the Albany Club, followed by a business meeting and informal party at the House Saturday evening.

A dinner party was given at the House on Sunday evening, at which several of the alumna were entertained by Albany guests at informal dinner parties and tom Sunday afternoon.

What Is Air Pressure?

The air is composed of molecules. They constantly bombard you from all sides. A thousand taps by a thousand knuckles will close a barn door. The taps as a whole constitute a push. So the constant bombardment of the air molecules constitutes a push. At sea-level the air molecules push against every square inch of you with a total pressure of nearly fifteen pounds.

Pressure, then, is merely a matter of bombarding molecules.

When you boil water you make its molecules fly off. The water molecules collide with the air molecules. It takes a higher temperature to boil water at sea-level than on Pike's Peak. Why? Because there are more bombarding molecules at sea-level—more pressure.

Take away all the air pressure and you have a perfect vacuum. A perfect vacuum has never been created. In the best vacuum obtainable there are still over two billion molecules of air per cubic centimeter, or about as many as there are people on the whole earth.

Heat a substance in a vacuum and you may discover properties not revealed under ordinary pressure. A new field for scientific exploration is opened.

Into this field the Research Laboratories of the General Electric Company have penetrated. Thus one of the chemists in the Research Laboratories studied the disintegration of heated metals in highly exhausted bulbs. What happened to the glowing filament of a lamp, for example? The glass blackened. But why? He discovered that the metal distilled in the vacuum depositing on the glass.

This was research in pure science—research in what may be called the chemistry and physics of high vacua. It was undertaken to answer a question. It ended in the discovery of a method of filling lamp bulbs with an inert gas under pressure so that the filament would not evaporate so readily. Thus the efficient gas-filled lamp of today grew out of a purely scientific inquiry.

So, unforeseen, practical benefits often result when research is broadly applied.

Miss Charlotte Benedict, '21, has again been forced to return to her home at Fonda, New York, on account of illness.

The "personed" of the "Y" House was considerably reduced during last week-end. Among the missing were Harriet Holmes, '21, May Wood, '21, Ethel Mead, '23, besides the usual week-enders, Ethel Rice, '22, and Carrie Erens, '22.

The "Y" House is glad to welcome dearest Dick for all found that he left an essential fabric.

During school hours the water molecules collide with the air molecules. It takes a higher temperature to boil water at sea-level than on Pike's Peak. If you were to boil water at sea-level you would have a perfect vacuum.
