The Class of Nineteen Hundred and Sixty presents

BRICKS AND IVY

to

The Faculty of The Milne School

The Milne School
440 Washington Avenue
Albany, New York
Pagathurus: What must I do now, to maintain my dignity, and propogate my values?

Shartanea: Forget thy projected image. Behold knowledge at your feet! Thou art a free being and must create thyself.

Pagathurus: Knowledge, then, is my responsibility? Must I shoulder responsibility for myself?

Shartanea: Thou must grasp thy irrevocable freedom. Cast thy image away, and strive to be thy own ideal. Do not ask others to bear your existence. Live only through yourself.

Pagathurus and

Shartanea: Behold knowledge! Let us rise above our past; better men on a new horizon.
Increased support should be provided primarily to colleges and universities, the natural habitat of basic research, where the large majority of basic scientists are employed and where the advanced training of future scientists and engineers takes place. Research is like saving: when you need it most, it is too late to start.

Wernher Von Braun
"No matter what his future work may be, he can be sure that a sound knowledge of chemistry will contribute to his success."

*Elements of Chemistry*

...Binding the earth and water to your service, Exploiting the seas and developing the mountains, Dividing the stars into common and preferred...

T. S. Eliot

"The physical sciences are actually mathematics on a tangible basis. That is, what can be expressed by symbols in mathematics, can be interpreted as motion or one of the other branches of physics. It is my belief the study of physics contributes to a greater understanding of the universe on the tangible level in much the same way that the study of the humanities contributes to a greater understanding of the universe on the intangible level."

Douglas Price Margolis
"The meaning of Biology is its human meaning, its significance to you as a person, but that meaning can only be made clear if human biology is seen as a part of the biology of all life."

*Life—An Introduction to Biology*

**Mr. Cecil Johnson**
"Then the might of the sun shines down on the wide fertile, beautiful regions, filled with the works built by the labours of man."

Solon
"The basic characteristic of scientist's thinking is willingness to let evidence determine judgement."

*Elements of Chemistry*

"Let me tell you this: someone in some future time will think of us!"

*Sappho*
A hundred times every day I remind myself that my inner and outer life depend on the labours of other men, living and dead, and that I must exert myself in order to give in the same measure as I have received and am still receiving.

Albert Einstein
For the distinguishing of the simplest things from those that are complex, and in the arranging of them in order, we require to note, in each and every series of things in which we directly deduce truths from other truths, which thing is simplest, and then to note how all the others stand at greater or lesser or equal distance from it.

Descartes
Let every man judge according to his own standards, by what he has himself read, not by what others tell him.

Albert Einstein
All our knowledge brings us nearer to our ignorance...

T. S. Eliot
"Knowledge of mathematics is essential in order to understand and appreciate the complex problems of today. Mathematics is employed in many more fields today than ever before: engineering, business office work, technological research, and many more. It is more than a series of equations—it is a means of communication."

Tim Hamilton

"Above all I delighted in Mathematics because of the certainty and evidence of their reasoning."

Descartes
This is the first age since the dawn of history in which mankind has dared to believe practicable to make the benefits of civilization available to the human race.

Arnold Toynbee

"History is the Essence of innumerable biographies."

Oliver Cromwell

I have read somewhere or other, in Dionysius of Halicarnassus, I think, that history is philosophy teaching by example.

Viscount Bolinbroke

"History is the soil from which sprouts the future. The individual mistakes of cultivation affect the whole field. The knowledge of these mistakes predict the harvest."

Lana Spraker

Dr. Gerald Snyder
"The world turns and the world changes,
But one thing does not change.
In all of my years, one thing does not change.
However you disguise it, this thing does not change:
The perpetual struggle of Good and Evil."

T. S. Eliot

BASKETBALL GAME—Left to right: M. Daggett, M. Grogan, J. McClelland.
The vibrant, loyal crowd.

At the game's end we shall see who gains.
George Herbert

GYM
MGAA Council plans many activities for the Milne girls... G.A.A. Play days... the newly added outside activity... The Annual Mother and Daughter Banquet... Student Teacher tea.
What was the moral instruction provided by sports?

Loyal obedience to rules of the game jointly defined and freely accepted.

Camus' Last Answers
The Milne physical education program is beneficial and valuable not only physically but also mentally and emotionally.

The program is beneficial in a physical sense, because through the various sports, physical fitness tests, and exercises, we learn the areas in which we are especially strong or weak and what can be done to improve our condition. Each person's degree of strength, balance, accuracy, grace or agility, is shown to him, and exercises and other methods of correction are explained. Even if the program is not followed up by the girl or boy, the amount of exercise received in gym classes and intramurals is better than no exercise at all.

Emotionally, Milne's program is beneficial in several ways. Teamwork, cooperation, sportsmanship, and common courtesy are necessary elements in the Milne program. The girl or boy lacking in these traits will either develop them quickly or receive less-than-perfect grades, both in achievement and adjustment.

The Milne physical education program is not a way to waste three periods a week, but rather a method of developing students, both physically and emotionally.

ENGLISH 7
The real problem is to know when to stand by the old truths and when to spread out in new experimental ways.

Baruch

My role . . . is not to transform the world nor mankind. I have not enough virtue nor sufficient wisdom for that. But it is perhaps to serve, in my place, those few values without which a man, even new, is not worthy of respect.

Camus
In the midst of the darkest winter
I find an invincible summer
Albert Camus
But do not imagine I am suffering disappointments here—quite the contrary. I marvel sometimes how readily I give up everything I expect for the reality, even when the reality is bad.

My God, if any of it could be shared! But would it be then, would it be? No, it is only at the price of solitude.

Brigge
S. Waley

Mr. William Kraus
Art enhances life. It enables the student not only to solve problems, but allows him to create the problem as well. It gives man a bond with the past and with the future without binding him to either.

By encouraging creative thinking, art aids the student immeasurably in later life, whether he be a scientist, doctor, lawyer or member of any other profession.

Stuart Lewis

Music resembles poetry: in each are nameless
And which a master-hand alone can reach.

Pope
That is a good book which is opened with expectation and closed with profit.

Amos Alcott
Seniors

Because I have confidence in the power of truth and of the spirit, I believe in the future of mankind.

Albert Schweitzer
There is no sun without shadow
and it is essential to know the night.

Albert Camus

I have stood among the bitter words
the cynics tireless function
the losing world misled.
I stand now on a flat plain
perceive the distant magnet
in its quarter turn,
the Atom sewn as grass above
the fear and trembling of the earth
perceive myself in this incoherent
age of burial
I in ambiguous city of heat,
perceive the winter's cold
revealing new ambition
perceive the dignity of men.

interested in a job after graduation?

If we were looking for a symbol of the telephone business, it would be the telephone operator. She is our first line of communications, important to the functions of her community and to the welfare of our nation. Operators have saved lives, prevented crimes and averted disaster by their expert handling of important calls. And in her normal, everyday work, she is the key person in the business and social activity transacted by phone.

YOU MAKE YEARBOOKS FUN
HERE AT PROGRESS
in
"The City of Albany"

Working closely with you has been truly a wonderful experience. In the beginning there was nothing except enthusiasm, ideas and many blank pages. Upon this meager foundation you have built this beautiful memory book. Our work at Progress really is fun . . . because we enjoy, so much, getting to know such splendid faculty members and students as you.
