

## Web Resources for Downloadable Audio Files to Use and Modify

The following websites have openly licensed and public domain music and sound clips. These royalty free files may be modified and available for use. Please read the copyright and fair use guidelines on each site. Licensing may restrict how works are shared and used. Not all files on each site are available for download. Most of these resources prohibit use if the audio files are distributed or sold. Remember to provide attribution [cite source] when posting. Click [here](#) for information on citing and using online sound recordings.

Most of these resources do not charge a fee to download files. This is not a comprehensive list.

- Bensound <https://www.bensound.com/>
- Free Music Archives <https://freemusicarchive.org/search/>
- freesound <https://freesound.org/browse/>
