**Debunking IUE Claims About GM Agreement**

The IUE's "Golden Rule" has been reported by several newspapers in recent articles. This rule states that "the union will not make any contract unless it has the agreement of the local union." However, this rule is not universally applied by all locals of the IUE. Some locals have made contracts that are not in agreement with the Golden Rule. The IUE's national headquarters has been forced to negotiate with these locals to ensure that the Golden Rule is followed.

**Lincoln-Electric Strike**

The Lincoln Electric strike, which began in March and continued into April, was a significant event in the electrical industry. The strike was caused by a dispute over wages and working conditions. The company refused to negotiate with the union, and the workers went on strike. The strike lasted for several weeks and eventually ended with a settlement.

**电气安全部**

电气安全部提供了一系列安全管理指南，旨在帮助工人和管理层确保工作场所的安全。这些指南涵盖了各种潜在风险，包括电路故障、设备操作不当和高空作业等。

**City Councilman Dripp**

City Councilman Dripp speaks on the importance of maintaining a stable economic environment. He emphasizes the need for cooperation between the city and the private sector to ensure the growth and development of the city. Dripp is also concerned about the impact of immigration on the city's economy.

**Mississippi River**

The Mississippi River is a significant geographical feature in the United States, flowing through several states and providing both natural beauty and economic opportunities. The river is also a vital waterway for transportation and commerce.

**Retroactive Pay Won**

In a recent victory for workers, the Local 3044 against the American Unit, the workers were awarded retroactive pay for unpaid work.

**Do Not Let General Electric Chisel on the Contract!**

The IUE has been negotiating a contract with General Electric for several months, and the negotiations have been contentious. The union is concerned about job security and wages, while the company is focused on reducing costs. The contract negotiations are expected to continue into the summer.
Erie GE Workers Are Solid for UE

An overwhelming US victory in the National Labor Relations Board election at the GE plant at Erie, Pa. was predicted by two leaders of the UE Local 69 at the UEaukee meeting. Mr. W. E. McLaughlin, president of the local, said that "Over the past few weeks the UE members at Erie have been fighting hard to win the battle of the company's spies."

McLaughlin said that the two leaders of the local have been fighting hard to win the battle of the company's spies. "We are going to win," he said, "and we are going to do it because the workers of Erie are not going to be cheated.

IUE Leaders Contradict Themselves
In Praising Atomic Energy Commission

The "International" (IUE) has now come out in public praise of the Atomic Energy Commission, citing the improved working conditions of atomic energy workers under the IUE-GE contract. Two of the leaders of the IUE, Frank C. Reiner and Henry Hilke, took the same stand in a letter to the Atomic Energy Commission. The letter was signed by the 100 IUE-GE districts, and it was printed in the IUE-GE bulletin, dated Oct. 30, 1948.

"We wish to express our appreciation of the services of the Atomic Energy Commission. The numerous reports and statements issued by them are a credit to the whole body of workers in our industry." The letter, dated Oct. 30, 1948, is quoted.

As a Catholic, I am deeply disturbed that the Albany Diocese has been so loudly misrepresented about the real issues in the Labor Board elections scheduled tomorrow at the Ilion Remington Rand plant.

It is a matter of record that the President of the U.S., and a great majority of the General Executive Board, as well as great numbers of District and Local Officers are members of the Catholic faith.

It is not Communist-controlled. It is not Communist-controlled. It is not Communist-controlled. It is not Communist-controlled. It is not Communist-controlled. It is not Communist-controlled. It is not Communist-controlled. It is not Communist-controlled. It is not Communist-controlled. It is not Communist-controlled.

The issues in this election are clear to all, whether Catholic, Protestant, or Jew. The Remington Rand workers are as well aware of the issues as any other worker and will be voting according to their conscience. The plant is a modern and progressive one, with a first-class management, a clean and efficient working atmosphere, and a factory that everyone is proud to work at.

In conclusion, I would like to say that the Remington Rand workers are voting according to their conscience and are not influenced by any outside pressure. They are voting for a union that will represent their interests and work for better wages and working conditions.
