Margaret Fitzgerald, a beauti-

fied woman, was crowned queen in the beauty contest of the Kings Park State Hospital chapter. She received the title of "Beauty Queen" for her participation in the contest.

MINIMUM REQUIREMENTS that prove too stiff to be of any value are of discussion. Resultant eligible lists are too small, too many eligibles decline appointment, too many appointees don't stay. This calls for at least a broader base of recruitment.

The Unhappy Pay Raise

A t a meeting in the post office compound last week, the employees of the State Correction Department point out that their working conditions are much worse than those of other employees working in state offices. They claim that they are being paid a wage insufficient to cover the cost of living, and that they are being subjected to overwork and underpayment.

The employees have been struggling to improve their working conditions for years, but have been met with resistance from the state government. They have been warned that they will not be allowed to strike, and that any attempts to do so will be met with legal action.

In the meantime, the cost of living has continued to rise, and the employees are becoming increasingly frustrated. They have begun to organize, and are planning to take action to improve their working conditions.

The state government has refused to negotiate with the employees, and has instead attempted to dismiss their concerns as groundless.

The employees are determined to fight for their rights, and are not afraid to take strong action to ensure that their voices are heard. They are looking to the community for support, and are calling on others to join them in their struggle for justice.

The state government must listen to the employees' concerns, and must take action to improve their working conditions. The employees are determined to win, and will not be deterred by the state government's attempts to silence them.

For Correction Men—R10 or R11?

Employees of the State Correction Department point out that under the new State pay plan, they may be converted into correction officers without their consent. The new pay plan is being implemented to save money, and the employees are concerned that it may lead to a decrease in their benefits.

The employees have not been consulted about the new plan, and are concerned that they may be forced to accept a new position that they do not want. They are calling for a meeting to discuss the new plan and their concerns.

The State Correction Department has not responded to the employees' concerns, and has not provided them with any information about the new plan. The employees are determined to fight for their rights, and are calling on others to join them in their struggle for justice.

The State Correction Department must listen to the employees' concerns, and must take action to ensure that they are treated fairly. The employees are determined to win, and will not be deterred by the State Correction Department's attempts to silence them.

**State Finds Cigarettes Lung Cancer Factor**

ALBANY, March 22 — Dr. Morton L. Levin, of the State Department of Health, reported today that the State's cancer hospital at Buffalo had strengthened the evidence for the role of lung cancer for smokers of 20 or more cigarettes a day was 10 times that for non-smokers.

**Other Factors Engender**

The report also indicated that less than one pack a day had five times as much lung cancer incidence as non-smokers. Cases of the disease among male smokers occurred only one third as frequently than in non-smokers. Dr. Levin said these estimates of the effect of smoking are too low because the smoking histories were not analyzed for all the various factors in the study.

The report was based on a review of all studies of lung cancer incidence, which carried on at the Institute, emphasized that the evidence does not indicate smoking is the sole causative factor, or even that it is operative in the absence of other demonstrable tobacco or atmospheric pollution by industrial waste, engine exhaust fumes, dust from tar, and smoke, and occupational exposure to carcinogenic fumes or radion.

Effect: Double

Doctor Levin noted that in a 1947 paper on lung cancer, developing lung cancer at some point in life there were more than two per cent of men in New York City. In 1939 and 1949, 5.9, adjusted lung cancer more than doubled among males in New York State by 380 per cent and among females by 28 per cent, he said.
