LEFKOWITZ THANKED FOR CONFERENCE TALK

In an address to the members of the Metropolitan Conference of the CSEA at its September meeting, Attorney General Louis J. Lefkowitz thanked the Conference for its past and present efforts in behalf of civil service employees.

"Mr. Lefkowitz emphasized this point with a description of the work done by civil service employees in his office who often work late into the evening to serve the public," said the Attorney General.

The members of the Conference voted to support a resolution calling for a $600 increase across the board for all state employees.

Assemblyman Giacchele thanked Mr. Lefkowitz for his past and present efforts in behalf of civil service employees.

CSEA Group Life Plan To Continue Extra Benefits

The CSEA Pension-Insurance Committees and Board of Directors have approved the continuation during the policy year beginning November 1, 1958, of the extra benefits under its Group Life Insurance Plan which were added to the Plan without additional cost to over 40,000 insured CSEA members.

These additional benefits include 30% additional insurance (double indemnity for accidental death, waiver of premiums for total disability prior to age 60, and other improvements). The CSEA Group Life Insurance Plan contract will be amended to enable eligible members to continue in service beyond age 60 to convert their insurance at lower ages before termination of employment and thus at lower attained age rates. During the first year of this change, any insured member over age 60 will be able to convert his Group Life Insurance at any time even while in employment, which was not allowed before.

After the change has been in effect for one year, insured members will be given the option of converting their insurance at age 60 or at age 65, even though still employed. Hereafter, conversion was possible only upon termination of employment, retirement, or attainment of age 70. The premium changes have been filed with the State Insurance Department and await the approval of that agency.

Rate Credit Changes

There was a slight increase in the loss experience under CSEA Group Life Insurance Plan during the year which ended on August 31, 1958. This, of course, resulted in a lower estimate of the premium income, which is the percentage of claims paid to premiums collected, reduced the endowment credit and the annualized rate credit or dividend.

The CSEA board of directors, meeting in executive session at their meetings held on October 22, 1958, decided to maintain a balance of $131,000.00 in the Group Life Plan rate credit account on deposit with the insurance company. This balance compares with a balance of $139,000.00 which the Board decided to maintain the previous year. Maintenance of such a balance is essential as a cushion against the possible increase in loss experience during too experience in the coming year is more favorable than expected, the CSEA Pension Insurance Committee and Board of Directors decided there would be no refund of premiums to insured members during the coming year. It is expected that if the loss experience during the coming year is more favorable than expected, the CSEA Pension Insurance Committee and Board of Directors will consider additional benefits to provide more protection to the members insured under the plan, or a refund of premium is suitable additional benefits cannot be arranged.

Where Sovereignty Ends and Civil Rights Begin

The attempt by a union to organize the New York City police has attracted national attention. Newspapers throughout the land have printed stories about it. Magazines of large national circulation, like the United States News and World Report, published feature articles on the subject, Nationally syndicated columnists, like George E. Sokolky, discussed the pros and cons. At an international police dinner, in New York City, Commissioner Stephen P. Kennedy discarded a prepared speech to sound out exasperation about the movement and was acclaimed by the police as like the Policemen's Beneficent Association, attempting to operate like a union, or, as the Commissioner put it, a strike union.

The PBA asked Mayor Robert P. Wagner for sole collective bargaining rights. The Commissioner is opposed, he says, for it makes of unions. Moreover, Commisioner Kennedy used as a principal argument the assertion Mr. Sokolky had made only two days before, that the police are charged with the responsibility of maintaining peace and order, and the columnist, in a sovereignty function, to be distinguished from proprietary operations, and the Commissioner echoed the phrase.

Conflict-of-Interest Argument

Argumentative opposition to police unionisation is also based on the contention that conflict of interest might arise; the police must then choose between their allocable impartial representation of interest and due service to the public. As the Commissioner put it, no government in the free world can compel any man to become one employee organization wants or seeks any part of running a government. When he said that, he was speaking as a patrolman who stands aghast at his low pay.

One employee organization wants or seeks any part of running a government. What the policemen seek, and have long been denied, not only the right to Institute forced labor and even to confiscate. It means in the Bill of Rights and in State constitutions. It means the right to decide and to set, and to exercise under powers that depend upon the exercise by an independent association of employees of powers as Federal employees. Social Security know, that the police power of the sovereign does not surrender to the exercise by an independent association of employees of powers for an employer and is well known. As legislative acts of the State Workmen's Compensation. The law will be given by spokesmen for the law as the Commissioner echo.

Questions Answered On Social Security

1) I HAVE BEEN DISABLED for several years and am now receiving a Social Security disability benefit, I heard that payments can now be made to children of disabled workers. Is this true? I have a son age 15.

2) If you are now receiving a disability benefit your child will now qualify for a Social Security benefit. Your wife may also be eligible for benefits. You should get in touch with the Social Security district office immediately about having your dependents apply for their benefits.

3) I AM RECEIVING Social Security benefits of $90 a month. My employer discontinued my Social Security after one and one-half years, as of February 3, 1956. I am not receiving a Social Security benefit. It is not necessary for you to apply for this increase as your benefits are on the rolls. The check will be mailed to you in February, 1956.

4) I WAS TOLD that if a disabled person receives workmen's compensation benefits, he cannot receive disability payments under Social Security. Is this true? C. E. B.

5) For months before August, 1958, the Social Security Administration paid the woman's compensation payments and Federal disability benefits either than compensation for a service connected disability were deducted from the amount of disability benefits. It is understood by the Social Security Administration that, beginning with August, 1958, the receipt of such benefits will not affect Social Security payments.

6) I HAVE BEEN receiving a disability benefit due to my severe illness. I heard recently that children of disabled workers may now become eligible for Social Security benefits. I have two children ages 13 and 15.

7) Yes. Under the new amendments to the Social Security Act, if you are receiving a disability benefit, your children may now become eligible. Your wife may also be eligible for benefits. You should contact your local Social Security district office as soon as possible with regard to having your dependents file an application.

Bryner Leads Exposure of Falsity of Claims

Congratulations to The Leader on its editorial "Prayers on the Air," January 21. Everyone said in that editorial relative to the Civil Service Employees Association and the CSEA. John T. DeGraff, CSEA counsel, and Joseph D. Lochner, executive director, can verify what the false claims, and they have still playing to bring about a better way of doing for State employees.

Editor, Leader:

I have lived through those efforts for close to 25 years. Time and again through the years I have returned statements from other departments as are Federal employees. Social Security know, that the police power of the sovereign does not surrender to the exercise by an independent association of employees of powers for an employer and is well known. As legislative acts of the State Workmen's Compensation. The law will be given by spokesmen for the law as the Commissioner echo.

on shal low theory, possible but improbable event ualities, on ignoring the fact that police are unionized in many jurisdictions in the United States, and in some cities and towns even negotiate on wages, hours, and working conditions, all without the untoward results that are "everywhere denied" in the theories on which opposition is based.

For instance, policemen who are members of unions do not themselves even to broach the possibility of their profaning oaths, violate their oath of office. It is an affront to the policeman himself to bring the possibility of their profaning that oath, and it is surprising to find a police commissioner adding his voice.

A Big Question Yet To Be Finally Decided

Not only should the police have the same organizing rights and labor relations resources as all others, but it may even be true that the right to join any legitimate employee organization of one's choosing is implicit in American citizenship. This question may well be one for the United States Supreme Court to decide. It has yet to be brought before that court, but such a basic question in civil rights can not be satisfactorily decided by any lesser court.

Commissioner Kennedy referred to unions as debating societies who issue their command decisions. That again confuses the issue through lines formed in Industrial strike operations, and do not labor relations resources as all others, but it may even be true that sovereignty power.

Labor relations and sovereignty are a contradiction in terms. The sooner government acts like a sovereign in matters of pay, hours, and working conditions, and starts acting merely as an employer, the higher will be public employee morale, and the better will our government become. The viewpoints and tactics that we borrow from totalitarianism, we should return promptly, and with out thanks.
