House Committee Cuts Budget For New Jobs Proposed by Kennedy

The 48,000 new Federal jobs requested by President Kennedy have already been cut down by the House Appropriations Committee, acting on an agreement for the 1962 fiscal year which will start on July 1.

Money for new positions in the Treasury Department, Department of the Interior, and in the Post Office Department has already been curtailed by the Committee, and it is expected that other agencies will probably get the same treatment.

The President's request to allow agencies to pay slight overtime to Federal workers and personnel to meet unforeseen requirements was rejected.

It is probable that the Kennedy recommendation, now before Congress, to create about 800 additional high level Federal jobs will also be rejected. A year ago a similar proposal by the Eisenhower Administration was ignored.

Federal Employment Increases During Feb.

Full civilian employment in the Federal Government rose to 2, 855,374 during February, an increase of 41,000 over the January figure of 2,814,304. All three branches of the Government increased, the executive branch increased to 2,262,874, the judicial to 50,974, and the executive to 2,303,786.

Full time employment was up from Jan. while part-time employment dropped. Since Feb. 106 full-time employment in the executive branch has increased by 2,803. Most of the gain was in increases in their numbers of full time workers during the year.

U.S. Recruiting College People For 8,000 Jobs

Civil Service Commission chairman John Macy has sent a "Federal Career Civilian Letters" to college officials throughout the country in which he said that opportunities regarding earlier entry into public service for college trained people are "better than ever."

Mr. Macy estimated that Federal agencies would fill about 18,000 beginning professional positions in the next two years. He emphasized that the Government is intensifying the search for "quality recruits" with potential for training and development to assume highly responsible positions in the future.

More than 2,000 professionals' entrance-level positions are expected to be filled through the Federal Service Externship examination which is used to recruit college people in all professional fields. About 10,000 recruits will be needed for beginning professional jobs in such areas as engineering, physical science, accounting and auditing forestry and conservation.

Kennedy Considering New Union Policy

The Kennedy Administration is reported to be considering setting up an Executive order which would establish a government policy on union recognition on the part of Federal departments and agencies.

Such an order would probably specify the right of Federal workers to join unions and the responsibility of industry to consult union leaders on matters of importance to employees.

Labor Secretary Arthur Goldberg and Civil Service Commission Chairman John Macy are said to be key figures in forming the new order.

N.Y. Post Office Opens Training Center

The New York Post Office announces the opening of the 1961 session of its postal institution and training center today. This is a special services feature of New York Postmaster Robert Christiansen's public postal education and mail improvement program.

Through these sessions, which will be held from now through May 18, the New York Post Office hopes to train mailroom personnel and other representatives of industry in proper mailing procedures and practices.

Marshals Must Do Jury Duty

ALBANY, April 34—A bill to disqualify marshals from jury service within New York City has been vetoed by Governor Rockefeller.

In a memorandum, the Governor declared the "irritating" disqualification from jury service is based upon a retirement hour and would compel a marshal to serve at a retirement luncheon. Mr. Walsh retires with 18 years of service.

The Ter Bush & Powell representatives listed below will be happy to explain how you, as a member of the C.S.E.A., can benefit through enrollment in the C.S.E.A. Accident & Sickness Plan. This plan does not conflict with the State Health Plan, and enrollment in both plans is recommended to provide the broad protection you and your family would want to have in the event of accident or illness.

Security for Those Disabled on the Job

NOBODY LOOKS FORWARD to permanent disability. However, accidents on the job will happen. It is a good idea for everyone to have a plan of what to do if they should be disabled.

The more prudent civil service employees, in thinking of their job advantages, will often get a sense of security out of the fact that if they are disabled, they are entitled to benefits from their union and on their jobs, they will receive a substantial retirement allowance as well.

UPON RETIREMENT for accidental disability a member of the retirement system, either State of New York City, receives a retirement allowance which is determined by three factors. The first is an annuity which shall be the actuarial equivalent of his accumulated contributions at the time of retirement. The second is an increase which is the actuarial equivalent of his accumulated contributions. The third is a pension of three-quarters of the final average salary. It is not "either or" one of the three factors. It is the total of all three factors.

The Police Pension Fund and The Fire Department Pension Fund of New York City pay a retirement allowance for accidental disability (New York City Administrative Code, Section B-414.0). The Police Pension Fund and The Fire Department Pension Fund of New York City pay a retirement allowance for accidental disability (New York City Administrative Code, Section B-414.0).

In H.I.P., there is no need to study your policy line by line to see what is and what is not covered... There are no fee schedules and no claim forms... There is no need to worry over insufficient cash allowances... There is no need to "share" additional charges through deductibles and co-insurance... There is no need to accumulate and total up medical bills in order to prove you have exceeded a deductible... There is no need to discuss your family income with the doctor... You don't have to watch for limitations on number of services and on kinds of services (such as specialist care).

And in H.I.P. you also have the satisfaction of knowing that each medical group physician provides only the services for which he has been specially trained.
